

APPENDIX A: BUILDING VULNERABILITY ASSESSMENT CHECKLIST

The Building Vulnerability Assessment Checklist is based on the checklist developed by the Department of Veterans Affairs (VA) and is part of FEMA #225, *Defense Manual on Mitigating Potential Terrorist Attacks Against Buildings*. This Checklist will help you to prepare your Threat Assessment because it allows a consistent security evaluation of designs at various levels. The Checklist can be used as a screening tool for preliminary design vulnerability assessment and supports the preparation of all steps in this How-To Guide.

The Checklist is organized into 13 sections: 1) site, 2) architectural, 3) structural systems, 4) building envelope, 5) utility systems, 6) mechanical systems, 7) plumbing and gas systems, 8) electrical systems, 9) fire alarm systems, 10) communications and information technology (IT) systems, 11) equipment operations and maintenance, 12) security systems, and 13) security master plan. To conduct a vulnerability assessment of a building or preliminary design, each section of the Checklist should be assigned to an engineer, architect, or subject matter expert who is knowledgeable and qualified to perform an assessment of the assigned area. Each assessor should consider the questions and guidance provided to help identify vulnerabilities and document results in the observations column. If assessing an existing building, vulnerabilities can also be documented with photographs, if possible. The results of the 13 assessments should be integrated into a master vulnerability assessment and provide a basis for determining vulnerability ratings during the assessment process.
