plumbing you'll get a lot of value out of this book. You can learn how to lay the piping and make a proper pipe joint or how to thread the pipe, pipe supports and steel structures and teach yourself to be a master of the fitter's craft with the step-by-step instructions, learning tools and types of equipment. A pipe fitter is a tradesperson who installs, assembles, fabricates, maintains and repairs piping systems. Pipe fitters usually begin as helpers or apprentices. Plumbers deal with building, industrial, commercial, marine, water supply, drainage and sanitation piping and heating/cooling systems. Plumbers plan, fabricate, install and test the pipes and tubing layouts, cut, bend or fabricate pipe or tubing segments and join those segments by threading them using lead joints and cementing them together. They install manual valves in pipes to control the flow through the pipes or tubes.
