attempted to redesign the already existed chain case For improvising the design we redesign the internal design clearance and we provide a procedure to overcome the chain cover rubbing also Not only these changes also we will improve the moulding design gating design cooling system and cooling fixture We explain in detail about the process packing improvement and validate the concept and selection In Chapter 8 we discuss the overall results of this project in a different scenario Validate the test result in the initial stage and try to find the fault in the process After identifying the fault we adopt the necessary actions and rectify the problem At the end of the stage we implement the changes in the vehicle and test the output If everything is working properly then we will get approval and validate the status of the product The expected time cost effort and overall expected benefits are described to validate the result Mainly it focuses on the achievement from this project and methodology adopted during its implementation In Chapter 9 we will summarise the project discuss the limitation and gains of our study Also deliberate the scope of future wok in this chapter **Automobile Industry in India** Dr. M.
