This document also provides recommendations and instructions for personnel working on installing, service, inspection, and testing of offshore cranes that are installed offshore.

These requirements are unique, but are not limited to the following:

- 1) Crane and equipment and production applications. These cranes are typically mounted on a fixed structure, decked structure, floating structure, structure, or ship-shaped vessel used in drilling and production operations for offshore cranes and rigs.
- 2) Offshore applications. These lifting devices (rated for 20,000 lbs (9000 kg) or more) are mounted on structures where wind and sea state is more frequently encountered. Other lifting items systems, cables, components, and other materials are not tested, service tested, etc. (in line with 10, 20, and 300).
- 3) Hoisting applications. Cranes for hoisting applications are installed on decks, not-enclosed areas or other vessels, and are used in construction and energy operations above and below the sea surface.

Equipment as a result of such testing used here for hoisting offshore applications (in line with 10, 20, and 300) are not included in the scope of this recommended practice.

Lifting devices not covered by this document should be applied, installed, and maintained in accordance with the manufacturer's recommendations.
