## **Apollo 13:**

*Apollo 13* Laura B. Edge, 2020-03-03 Houston we've had a problem On April 13 1970 the three astronauts aboard the Apollo 13 spacecraft were headed to the moon when a sudden explosion rocked the ship Oxygen levels began depleting rapidly Electrical power began to fail Astronauts James Lovell Jack Swigert and Fred Haise were about to be stranded in the inky void of outer space The mission to the moon was scrapped Now Apollo 13's only goal was to bring the crew home With the damaged spacecraft hurtling towards the moon at roughly six thousand miles per hour there was little hope of success But the astronauts and mission control were fully prepared to do whatever it took to return the crew to Earth This space disaster occurred at the peak of the United States Space Race against the Soviet Union But for four days in 1970 the two nations put aside their differences and the entire world watched the skies hoping and praying the astronauts would return safely As missions to Mars and commercial space flight become a reality the time is now to be reminded of our common humanity of how rivals can work together and support each other towards a shared goal Because no matter what happens or where we travel we all call Earth home

**Never Panic Early** Fred Haise, Bill Moore, 2022-04-05 The extraordinary autobiography of astronaut Fred Haise, one of only 24 men to fly to the moon. In the gripping *Never Panic Early*, Fred Haise, Lunar Module Pilot for Apollo 13, offers a detailed firsthand account of when disaster struck three days into his mission to the moon. An oxygen tank exploded, a crewmate uttered the now iconic words "Houston, we've had a problem here," and the world anxiously watched as one of history's most incredible rescue missions unfolded. Haise brings readers into the heart of his experience on the challenging mission, considered NASA's finest hour, and reflects on his life and career as an Apollo astronaut. In this personal and illuminating memoir, illustrated with black and white photographs, Haise takes an introspective look at the thrills and triumphs, regrets and disappointments, and lessons that defined his career, including his years as a military fighter pilot and his successful 20-year NASA career that would have made him the sixth man on the moon had Apollo 13 gone right. Many of his stories navigate fear, hope, and resilience, like when he crashed while ferrying a World War II air show aircraft and suffered second and third-degree burns over 65 percent of his body, putting him in critical condition for ten days before making a heroic recovery. In *Never Panic Early*, Haise explores what it was like to work for NASA in its glory years and demonstrates a true ability to deal with the unexpected.

In *Apollo 13*, the NASA mission report, some of the rare official documentation of the voyage of Apollo 13 is collected and made commercially available for the first time.
