Introduction To Macroeconomics Lecture Notes:

An Introduction to Mathematics for Economics Akihito Asano,2012-11-08 An Introduction to Mathematics for Economics introduces quantitative methods to students of economics and finance in a succinct and accessible style The introductory nature of this textbook means a background in economics is not essential as it aims to help students appreciate that learning mathematics is relevant to their overall understanding of the subject Economic and financial applications are explained in detail before students learn how mathematics can be used enabling students to learn how to put mathematics into practice Starting with a revision of basic mathematical principles the second half of the book introduces calculus emphasising economic applications throughout Appendices on matrix algebra and difference differential equations are included for the benefit of more advanced students Other features including worked examples and exercises help to underpin the readers knowledge and learning Akihito Asano has drawn upon his own extensive teaching experience to create an unintimidating yet rigorous textbook

Lecture Notes In State And Local Public Finance (Parts I And II) John Yinger,2020-01-06 This book is based on lectures conducted for two classes at the Maxwell School Syracuse University A Public Finance Seminar for PhD students in public administration and State and Local Public Finance for master s students in public administration Topics covered include the role of voters in a federal system the sorting of different households into different communities the determinants of public service costs the property tax and other sources of local and state revenue fiscal aspects of economic development and intergovernmental aid especially for education The notes for the Ph D class also cover several more advanced topics such as the estimation of education production and cost functions the capitalization of school quality into house values and tax competition among jurisdictions The focus in these notes is on the highly decentralized federal system in the United States but many of the principles and much of the behavioral analysis in the class apply to other countries as well These notes draw on Professor Yinger s extensive teaching experience and publication record in state and local public finance They should prove useful to many teachers scholars and students who find topics in state and local public finance that they wish to pursue

Lecture Notes on Economic Growth (I) Xavier Sala-i-Martin,1990 This is a survey of the literature on Economic Growth In the introduction we analyze the main differences between exogenous and endogenous growth models using fixed savings rate analysis We argue that in order to have endogenous growth there must be constant returns to the factors that can be accumulated A graphical tool is then developed to show that changes in the savings rate have different effects on long run growth in the two kinds of models we show that only endogenous growth models are affected by shifts in the savings rate We then explore two versions of the Raasey Cass Koopmans neoclassical model where savings are determined optimally one with exogenous productivity growth and one without
