Islamic Finance as a Complex System Haider Ali Khan, Karamo N.M. Sonko, 2020-07-24 There has been a rapid increase in the interest in the study of Islamic finance resulting in a dramatic rise in financing since the beginning of the century. By the end of 2017 global industry assets had reached 2.4 trillion and were forecasted to reach 3.2 trillion by 2020 despite historic challenges to Islam itself at the same time. This collection of chapters provides key theoretical, empirical, and policy insights into Islamic finance from an overall complex financial and economic systems perspective. Within the complex financial and economic systems framework, this book addresses questions such as how to conceptualize Islamic financial institutions in a nonlinear general equilibrium system, how to promote Islamic Finance in Africa, how Islamic is Islamic finance, and how it affects price stability among other topics. The book provides case studies in Africa and Asia, addresses the subject in a structural financial CGE model, demonstrates the development impact of Islamic finance, and presents an Islamic version of the Iceland Plan for Monetary Reform. *Research in Corporate and Shari'ah Governance in the Muslim World* Toseef Azid, Ali Abdullah Alnodel, Muhammad Azeem Qureshi, 2019-05-20 *Research in Corporate and Shari'ah Governance in the Muslim World* Theory and Practice aims to address a critical disciplinary gap between Islamic theory and the practice of the corporate sector in the Muslim World. Adopting a critical approach, the book sheds light on the impact of corporate governance on the economies of the Muslim world. **Islamic finance qualification** ,2007 **The Islamic Banking and Finance Workbook** Brian Kettell, 2011-08-15 The ongoing turbulence in the global financial markets has drawn attention to an alternative system of financial intermediation: Islamic banking and finance. This is now one of the fastest growing sectors within the market place and has so far remained on the sidelines of this unrest. Since the inception of Islamic banking thirty years ago, the number and reach of Islamic financial institutions worldwide has risen significantly. Institutions offering Islamic financial services constitute a significant and growing share of the financial system in several countries, and market participants everywhere are joining the race to study and be a part of this emerging financial system. The *Islamic Banking and Finance Workbook* is a one-of-a-kind workbook on the topic, enabling readers to test their understanding of Islamic banking and finance concepts. Although suitable as a standalone learning tool, the book is designed to test the information covered in the companion book *Introduction to Islamic Finance and Banking* and covers the fundamentals of Sharia, a law, the Islamic contracts, interpretations, and definitions: Murabaha, Mudaraba, Musharaka, Istisna'a, Salam, and Ijara, modes of finance: Takaful, and much more. Emphasis is placed on mini case studies, multiple choice questions, and tests of the basic concepts. It also includes a full answer key and brief chapter summaries, as well as learning objectives. The *Islamic Banking and Finance Workbook* is an essential learning tool for students and practitioners who want to test their knowledge of the rapidly growing

Financial and Accounting Principles in

Islamic Finance Samir Alamad, 2019-05-10 This book provides an original account detailing the origins and components of a faith based accounting system that was founded around 629 CE. By examining the historical development that the accounting systems underwent within the context of faith based rules and values, the book explains what is meant by the term faith based accounting together with a discussion of its characteristics in relation to various product structures and the underlying Islamic finance principles. It provides important theoretical and practical contributions by explaining accounting as a value based science rather than a value free object or abstract. This book explores the way in which religious rules act as a directive for accounting and auditing practices in IFIs. Through which the concept of money and digital currency within the theory of money and how it is enacted in a faith based context amid differences of opinions among its actors is examined. This is an important foundation to explain Islamic accounting and includes how this outcome would shape the faith based view regarding the new phenomenon of digital currency (DC). Also featured is the concept of paper money within the theory of money and how it is enacted in a faith based legal framework by identifying two core concepts of today's Fiat money as being a single genus or multi genera money. This book is not merely an academic work nor is it a pure practitioner guide; rather, it is a robust work that combines both. It marries rigorous academic research and theories with practical industry experiences. The book provides a clear and concise guide to accounting in Islamic economics and finance and how Islamic financial institutions could meet the applicable faith based rules in their accounting practices.
