Multiple Case Study Analysis Robert E. Stake, 2013-04-29 Examining situational complexity is a vital part of social and behavioral science research. This engaging text provides an effective process for studying multiple cases such as sets of teachers, staff development sessions, or clinics operating in different locations within one complex program. The process also can be used to investigate broadly occurring phenomena without programmatic links such as leadership or sibling rivalry. Readers learn to design, analyze, and report studies that balance common issues across the group of cases with the unique features and context of each case. Three actual case reports from a transnational early childhood program illustrate the author's approach, and helpful, reproducible worksheets facilitate multicase recording and analysis. **Become a Certified Personal Trainer (ebook)** Robert Wolff, 2010-01-04 Head-to-toe preparation for a successful career in personal training. Fierce Medicines, Fragile Socialities Dominik Mattes, 2019-08-01 Set in Tanga, a city on the Tanzanian Swahili coast, Dominik Mattes examines the implementation of antiretroviral HIV treatment (ART) in the area, exploring the manifold infrastructural and social fragilities of treatment provision in public HIV clinics, as well as patients' multi-layered struggles of coming to terms with ART in their everyday lives. Based on extensive ethnographic fieldwork, the book shows that notwithstanding the massive rollout of ART, providing treatment and living a life with HIV in settings like Tanga continue to entail social, economic, and moral challenges and long-term uncertainties, which contradict the global rhetoric of the normalization of HIV. **Essential Concepts of Electrophysiology and Pacing through Case Studies** Roderick Tung MD, Prabal K.
