It is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics. Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics. These are grouped by type of material. Publication dates range from the 1800s onwards. Hundreds of electronic resources, some online, both dynamic and static, some in fixed media, are listed among the paper resources. Amazingly, a majority of listed electronic resources are free. *Fundamentals of Engineering* National Council of Examiners for Engineering and Surveying, 2000
