New Directions in Geriatric Medicine Lee Ann Lindquist, 2016-04-09 This book is designed to present the clinical geriatric trends within general internal medicine and family practice which practitioners often encounter in caring for their older adult patients Chapters

focus on increasingly difficult clinical decisions that practitioners have to make in caring for older adults who often experience medical complications due to memory loss physical disability and multiple chronic conditions Written by experts in geriatric medicine each of these chapters start with the most up to date clinical geriatric research and provide specific examples or case studies on how to use this information to address the clinical needs of older adult patients In addition there is a set of concise take home points for each chapter that are easy to commit to memory and implement in clinical care of aging patients As the only book to focus on current trends in geriatric research and evidence based eldercare practice *Clinical Trends in Geriatric Medicine* is of great value to internists family practitioners geriatricians nurses and physician assistants who care for older adults [Oxford Handbook of Geriatric Medicine](#) Lesley Bowker,James Price,Sarah C. Smith,2012-08-09 The Oxford Handbook of Geriatric Medicine provides user friendly advice in a field that has limited evidence yet makes up a substantial proportion of the work of most clinicians *Fundamentals of Geriatric Medicine* Rainier P. Soriano,2007-05-26 Prior to the evolution of modern medicine with its superabundance of diagnostic and therapeutic medical technology and the rise of the litigious society the value of clinical skills was evident in both history taking and the physical examination Even today physicians can make a correct diagnosis solely by utilizing their clinical skills in about 90% of patient encounters Furthermore in the past physicians understood their role as a psychologist and were more apt to be familiar with the social context of their patients House calls were common The doctor was also a placebo who at his best inspired hope and probably sped recovery Geriatricians use both clinical skills and take advantage of modern technology sparingly for they know they are dealing with the most challenging and frail of patients older patients who so often present with multiple complex interacting behavioral social and physical problems In contrast to medicine for young people working with the older patient is much more demanding Furthermore the complex issue of societal attitudes toward old people can come into play especially the physician's need to deal with natural fears of aging dependency depression dementia and death Ageism is the enemy of effective medical treatment At its best geriatrics exemplifies ways that medical care for all ages can become more humane problem oriented and holistic
