Hands-on Networking with Internet Technologies Douglas Comer,2004 For one two semester undergraduate

courses in Computer Networking and Network Programming in Engineering and Computer Science This clearly written and logically organized text allows students to gain a deeper understanding of computer networks and internets by asserting that the best way to learn is by doing it allows for hands on experience with a real network Through experiments students learn that interconnecting hardware configuring software measuring performance observing protocols in action and creating client server programs over a network all help sharpen understanding The text is organized into six sections that each consider a hardware platform from the most basic to the most advanced and outlines experiments that can be carried out using these platforms This lab manual can be used with any computer networks textbook

Computer Networks and Internets

Douglas Comer,2015 Leading networking authority Douglas Comer presents a wide ranging self contained tour of the concepts principles and technologies that enable today s Internet to support applications ranging from web browsing to telephony and multimedia Comer begins by illuminating the applications and facilities offered by today s Internet Next he systematically introduces the underlying network technologies and protocols that make them possible With these concepts and technologies established he introduces several of the most important contemporary issues faced by network implementers and managers including quality of service Internet telephony multimedia network security and network management Comer has carefully designed this book to support both top down and bottom up teaching approaches Students need no background in operating systems and no sophisticated math Comer relies throughout on figures drawings examples and analogies not mathematical proofs

Mastering Networks Jörg Liebeherr,Magda El Zarki,2003 Class tested for several years this text drives home the fundamentals of networks by providing real experience and using real equipment Ten labs each covering a specific aspect of networking allow students to put the details of computer networking into practice thereby giving them a solid understanding of and appreciation for the discipline
