Solutions to AMPL Exercises

Initial Remarks About These Solutions and Some General Tips & Tricks As you have completed this problem set, you will have realized that a good organization of your model and data files are of crucial importance to not lose oversight or control of your work. I have found the following approach quite useful.

- Create a new AMPL folder and put all your related files into their own, tidy place. Do not throw your files together with ampl and solver executables onto your desktop or another, similarly wild location!
- Make sure that you can easily open your model and data files using a text editor, and that your computer shows the actual file extensions. There were several cases (especially using newer versions of Windows) where a folder showed a file model.mod or data.dat but AMPL complained that such a file could not be found, because the actual file name was model.mod.txt or data.dat.txt and Windows was set to hide extensions for certain (supposedly) known file types. Please, show your file extensions!
- Before modifying a working model or data file, always create a new copy and give it a descriptive name!
- Try hard to minimize the amount you have to type when working with AMPL (and in general). There is no need to repeatedly write model.mod; data.dat; solve; - on most computers, you can use the arrow keys to repeat previously typed commands; or even better, put all these into their own file (I usually call these "run" files) and use the single command ampl modeldata.solve.run or ampl modeldata.solve.run > output.out to write the AMPL output into a new file output.out (of course, you don't have to use the .run or .out extensions and can choose whatever you like). This also makes it very easy to include your solutions in a L^AT_EX file if you were to choose to do so. And yes, it will take some time to learn at first but eventually save you a huge amount of time - you'll see!

AMPL Book Exercises 1-2/1-3 For ease of comparison, we include the initial model and data below.
