[Six Steps to Successful Child Advocacy](#) Amy Conley Wright, Kenneth J. Jaffe, 2013-11-26
Six Steps to Successful Child Advocacy Changing the World for Children by Amy Conley Wright and Kenneth J. Jaffe offers an interdisciplinary approach to child advocacy nurturing key skills through a proven six-step process that has been used to train child advocates and create social change around the world. The approach is applicable for micro advocacy for one child, mezzo advocacy for a community or group of children, and macro advocacy at a regional, national, or international level. This practical text offers skill-building activities and includes timely topics such as how to use social media for advocacy. Case studies of advocacy campaigns highlight applied approaches to advocacy across a range of issues including child welfare, disability, early childhood, and education. Words of wisdom from noted child advocates from the U.S. and around the world, including a foreword from Dr. Jane Goodall, illustrate key concepts. Readers are guided through the process of developing a plan and tools for a real-life child advocacy campaign.

The Science Student's Guide to Dissertations and Research Projects Jessica Bownes, 2023-02-23
Scientific research should be interesting and exciting. When you finally get your data and even better, it makes sense. There's nothing quite like it. Your final research project will give you a flavour of what it will be like if you decide you would like to make a career in scientific research. This book will help you get the most out of that experience. In her years of work with students, Jess Bownes has answered countless questions about conducting and writing about scientific research. In this book, she distils her advice into one essential guide to writing dissertations and research projects and addresses the most common concerns and questions that science students have. This book supports students through the entire process of working on a dissertation, from the early but crucial planning stages through to undertaking practical work and collecting data, researching literature, and writing up one's findings. The structure of the book mirrors key stages of a research project or dissertation, making it easy for students to dip in and out as they work on their project. With lists, step-by-step guides, and plenty of practical examples, each chapter helps readers to approach their research in a focused and efficient manner. The book provides guidance on how to work effectively with one's supervisor so that readers can better judge when to work independently and how and when to seek advice. As students are

often worried about committing accidental plagiarism in research projects Bownes dedicates a chapter to this topic to ensure students have the skills and knowledge to use sources appropriately This is an essential companion for any undergraduate or Masters student who is writing a dissertation or research project in the sciences School Library Journal ,2003 New Ways of "learning the Library" -- and Beyond Linda Shirato,Elizabeth R.
