Nutritional Epidemiology: Advances in the Analysis of

Healthy and Sustainable Dietary Patterns Gladys Morales, Solange Parra-Soto, Israel Rios-Castillo, Sebastián

Cofre, 2026-02-26 The complex relationship between environmental health sustainable diets and nutritional epidemiology is crucial for understanding interactions and promoting healthy and sustainable dietary patterns Nutritional epidemiology plays a vital role in analyzing these patterns offering a more holistic view of diet quality and considering the synergistic effects of foods as well as the complex interaction between nutrients There are various indices that assess diet quality or adherence to healthy and sustainable dietary patterns such as the Mediterranean Diet Healthy Plant Based Diet Pro Vegetarian Diet and EAT Lancet which have been associated with a lower risk of cardiovascular diseases cancer and neurodegenerative diseases among others To advance the comprehensive capture of the diet the analysis of dietary patterns must consider additional aspects such as diet sustainability and its environmental impact By doing so we can develop more comprehensive approaches that promote both human and planetary health Since dietary patterns can reflect broader lifestyle patterns it is necessary to incorporate potentially relevant factors related to diet such as sociodemographic and socioeconomic factors as well as genes and biological factors This Research Topic focuses on the need to integrate environmental sustainability into the analysis of healthy dietary patterns While nutritional epidemiology has advanced in understanding the health impacts of diets it is crucial to also consider how these dietary patterns affect the environment Recent advances include the development of new indices that combine diet quality with sustainability and the application of advanced statistical methods to analyze the

complex interactions between diet health and sustainability This research topic aims to publish studies supporting the associations between healthy and sustainable dietary patterns and the risk of diseases relevant to public health with special attention to developing countries We invite original research and review articles for this special call including but not limited to the following topics Use of indices of nutrient rich affordable healthy and sustainable dietary patterns and their relationship with the risk of cardiovascular diseases cancer and or neurodegenerative diseases in disadvantaged populations Use of novel statistical methods and advanced analytical techniques in dietary pattern analyses Evaluation of educational strategies promoting the adoption of sustainable dietary patterns in different cultural and socioeconomic contexts Development of new methodologies and tools to assess the sustainability of different dietary patterns Systematic reviews with high rigor that critically explore the evidence of sustainable dietary patterns and their effects on cardiovascular health outcomes or neurodegenerative diseases Studies on how dietary patterns affect the metabolome and their relationship with disease prevention and food sustainability
