Curl-Langager, 2024-04-29 *Adulthood: An Introduction* offers a thorough foundation to learn, consolidate, and apply developmental concepts and current knowledge to the psychology of adult development. It illustrates major ideas with carefully selected research that is widely referenced and topically pertinent to development in early, middle, and late adulthood. This comprehensive text reviews the five domains of development: biological development, cognitive development, personality development, social development, and ecological influences in development. It introduces multicultural perspectives and contexts in these discussions, as well as developmental themes such as nature and nurture, early and later experiences, and the individual's active role. Accompanied by learning objectives and section reviews, vignettes portray numerous adult experiences, and commentaries for students offer additional information and interpretation with the student's perspective in mind. Designed to encourage students to think critically about topics of adulthood in both academic and applied settings, *Adulthood* is appropriate for undergraduate students in psychology and related disciplines such as addiction studies, speech pathology, criminal justice, nursing, and business. Combined with a complete ancillary package, the book provides activities for individuals and groups, critical thinking questions, vignette-specific questions and responses, perspectives across disciplines, and much more. Additional resources for both students and instructors are available in the book's Support Material.

**Bibliography of Agriculture**, 1991 *Nutrition, Concepts and Controversies* Eva May Nunnelley Hamilton, Eleanor Noss Whitney, Frances Sizer Webb, 1985 Abstract An authoritative text for the general public covers numerous nutrition facts and related controversies. Topics include the human body's basic nutrient needs, food groups, nutrient density, food exchanges, and how new food choices complicate the attainment of an adequate diet, recommended nutrient allowances, and U.S. and Canadian nutrient surveys. Energy, nutrients, carbohydrates, lipids, proteins, and their metabolic roles; energy balance vs. overweight, obesity, and underweight; weight control guidelines; water and micronutrients; food safety; nutritional tips for vegetarians and for those who eat out often; and nutritional guidance for various age groups from birth to the elderly. Food features in each of the 15 chapters link theory with practice and offer advice for everyday living. A section on optional reading representing controversies follows each chapter and focuses on nutritional topics of current interest.
