Federal Emergency Management Agency Customer Service Course United States. Federal Emergency Management Agency, 2000 Shelter Survey Technician Course United States. Federal Emergency Management Agency, 1985 *The Smallpox Vaccination Program* Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on Smallpox Vaccination Program Implementation, 2005-09-06 December 13 2002 the president of the United States announced that smallpox vaccination would be offered to some categories of civilians and administered to members of the military and government representatives in high risk areas of the world The events that precipitated that historic announcement included a series of terrorist attacks during the 1990s which culminated in the catastrophic events of 2001 Although preparedness for deliberate attacks with biologic weapons was already the subject of much public health planning meetings and publications as the twentieth century neared its end the events of 2001 led to a steep rise in bioterrorism related government policies and funding and in state and local preparedness activities for example in public health health care and the emergency response and public safety communities The national smallpox vaccination program is but one of many efforts to improve readiness to respond to deliberate releases of biologic agents The Institute of Medicine IOM Committee on Smallpox Vaccination Program Implementation was convened in October 2002 at the request of the Centers for Disease Control and Prevention CDC the federal agency charged with implementing the government's policy of providing smallpox vaccine first to public health and health care workers on response teams then to all interested health care workers and other first responders and finally to members of the general public who might insist on receiving the vaccine The committee was charged with providing advice to the CDC and the program investigators on selected aspects of the smallpox program implementation and evaluation The committee met six times over 19 months and wrote a series of brief letter reports *The Smallpox Vaccination Program Public Health in an Age of Terrorism* constitutes the committee's seventh and final report and the committee hopes that it will fulfill three purposes 1 To serve as an archival document that brings together the six reports addressed to Julie Gerberding director of CDC and previously released on line and as short unbound papers 2 To serve as a historical document that summarizes milestones in the smallpox vaccination program and 3 To comment on the achievement of overall goals of the smallpox vaccination program in accordance with the last item in the charge including lessons learned from the program

Community Emergency Response Team Homeland Security Dept., Federal Emergency Management Agency, 2018 CERT Community Emergency Response Team is a critical program in the effort to engage everyone in America in making their communities safer more prepared and more resilient when incidents occur Community based preparedness planning allows us all to prepare for and respond to anticipated disruptions and potential hazards following a disaster As individuals we can prepare our homes and families to cope during that critical period Through pre event planning neighborhoods and worksites can also work together to help reduce injuries loss of lives and property damage Neighborhood preparedness will enhance

the ability of individuals and neighborhoods to reduce their emergency needs and to manage their existing resources until professional assistance becomes available. Studies of behavior following disasters have shown that groups working together in the disaster period perform more effectively if there has been prior planning and training for disaster response. These studies also show that organized grassroots efforts may be more successful if they are woven into the social and political fabric of the community neighborhood associations schools workplaces places of worship and other existing organizations. Effective response therefore requires comprehensive planning and coordination of all who will be involved government volunteer groups private businesses schools and community organizations. With training and information individuals and community groups can be prepared to serve as a crucial resource capable of performing many of the emergency functions needed in the immediate post disaster period. The CERT Program is designed to train individuals to be assets to help communities prepare for effective disaster response.
