*Must-see Websites for Parents & Kids* Lynn Van Gorp, 2007-10-15 Collects websites that are family friendly and may be useful for homework with suggestions regarding navigation and possibly useful tools      **Children's Internet Search**

Elizabeth Foss, Allison Druin, 2022-05-31 Searching the Internet and the ability to competently use search engines are increasingly becoming an important part of children's daily lives Whether mobile or at home children use search interfaces to explore personal interests complete academic assignments and have social interaction However engaging with search also means engaging with an ever changing and evolving search landscape There are continual software updates multiple devices used to search e.g. phones tablets an increasing use of social media and constantly updated Internet content For young searchers this can require infinite adaptability or mean being hopelessly confused This book offers a perspective centered on children's search experiences as a whole instead of thinking of search as a process with separate and potentially problematic steps Reading the prior literature with a child centered view of search reveals that children have been remarkably consistent over time as searchers displaying the same search strategies regardless of the landscape of search However no research has synthesized these consistent patterns in children's search across the literature and only recently have these patterns been uncovered as distinct search roles or searcher types Based on a four year longitudinal study on children's search experiences this book weaves together the disparate evidence in the literature through the use of 9 search roles for children ages 7-15 The search role framework has a distinct advantage because it encourages adult stakeholders to design children's search tools to support and educate children at their existing levels of search strength and deficit rather than expecting children to adapt to a transient search landscape      *Information Literacy Programs* Patricia Durisin, 2002 This collection provides the viewpoints of librarians who have taken varying paths in their information literacy programs It covers the roles of Web based collaboration teamwork with academic and administrative colleagues evidence based librarianship and active learning strategies      *Women's Issues in Transportation*, 2010 Women's Issues in Transportation Summary of the 4th International Conference Volume 2 Technical Papers includes 27 full peer reviewed papers that were presented at the October 2009 conference The conference highlighted the latest research on changing demographics that affect transportation planning programming and policy making as well as the latest research on crash and injury prevention for different segments of the female population Special attention was given to pregnant and elderly transportation users efforts to better address and increase women's personal security when using various modes of transportation and the impacts of extreme events such as hurricanes and earthquakes on women's mobility and that of those for whom they are responsible TRB's Conference Proceedings 46 Women's Issues in Transportation Volume 1 Conference Overview and Plenary Papers includes an overview of the October 2009 conference and six commissioned resource papers including the two keynote presentations      **Guide to Academic Library Research: A Student Workbook**, 1997      *New Accountant*, 2003      **Proceedings of the National**
