Material And Energy Balances For Engineers And Environmentalists (Second Edition) Colin William Oloman, 2023-06-20 Material and energy M E balances are fundamental to biological, chemical, electrochemical, photochemical, and environmental engineering disciplines and important in many fields related to sustainable development. This comprehensive compendium presents the basic M E balance concepts and calculations in a format easily digested by students, engineering professionals, and those concerned with related environmental issues. The useful reference text includes worked examples for each chapter and demonstrates process balances in the framework of M E concerns of the 21st century. The additional problems and solutions in the Appendix embrace a wide range of subjects from fossil fuels to fuel cells, solar energy, space stations, carbon dioxide capture, and sodium ion batteries.

Modelling of Chemical Process Systems Syed Ahmad Imtiaz, 2023-07-25 Models and simulations are widely being used for design optimization, fault detection and diagnosis, and various other decision making purposes. Increasingly, models are developed at different scales and levels, all the way from molecular level to the large scale process systems scale. Modelling of Chemical Process Systems gives readers a feel for the multiscale modelling. As models have been developed for various applications, a general systematic method for building model has emerged. This book starts with the history of modelling and its usefulness, describing modelling steps in detail. Examples have been chosen carefully from both conventional chemical process systems to contemporary systems including fuel cell and bioprocesses. Modelling theories are complemented with case studies that explain step by step modelling methodologies. This book also introduces the application of machine learning techniques to model chemical process systems. This makes the book an indispensable reference for academics and professionals working in modelling and simulation. Includes case studies that explain step by step modelling methodologies. Covers detailed multiscale modelling of chemical processes providing examples from traditional and novel areas. Provides modelling insight at micro and macro scale levels including machine learning techniques.

Pullulan Shakeel Ahmed, Aisverya Soundararajan, 2020-12-30 Pullulan is a polysaccharide produced by the fungus *Aureobasidium pullulans* and possesses some distinct properties such as excellent transparent film forming ability, moisture absorptivity, water solubility, non-toxicity, and adhesivity.
