EU-Korea Relations in a Changing World Leuven Centre for Global Governance Studies,2013 *The European Union, Emerging Global Business and Human Rights* Aleydis Nissen,2022-11-17 Emerging and developing states are home to powerful corporations capable of deploying economic activities on a global scale through the rapid pace of technological change and globalisation But such corporations have to date been largely overlooked in the field of business and human rights Treatment of such corporations has typically been in the context of supply chain studies as subsidiaries of corporations from economically developed Western states This book takes a radically different approach It aims to investigate the conditions under which the European Union and its Member States regulate and remedy human rights violations by corporations from emerging and developing states Stemming from the hypothesis that the EU intends to play a central role Aleydis Nissen explores how the EU and its Member States attempt to ensure that EU based businesses are not undercut by emerging competition drawing on global examples to illustrate this developing phenomenon *Korea's Relations with Her Neighbors in a Changing World* Hak-chun Kim,1993 *EU Environmental Governance* Amandine Orsini,Eleni Kavvatha,2020-09-13 This book presents an overview of the field of environmental law and policies within the European Union from theoretical foundations to major issues and applied governance solutions Drawing on expertise from renowned academics and practitioners from different disciplines EU Environmental Governance Current and Future Challenges helps readers to understand the main legal political and economic issues of environmental protection since the adoption of the Paris Agreement by the European Union in 2015 until the 2020 Brexit European Green Deal and coronavirus outbreak The authors examine a broad range of sensitive and topical environmental issues including climate change air pollution waste management and circular economy nuclear waste biodiversity agriculture chemicals nanotechnology the environmental impacts of trade and environmental conflicts presenting both current insights and future challenges Overall this volume exposes the reader to a vast array of empirical case studies which will bolster their training and help tackle the environmental challenges faced by Europe today This book is a valuable resource for students researchers and policymakers across a broad range of fields including environmental law and policies environmental economics climate science and environmental sociology **Opening to Omnilateralism** Wolfgang PAPE,2021-03-11 Opening to Omnilateralism After a century of western inspired multi lateralism its much criticised 75 years old stronghold the UN needs a new narrative omni lateralism The right vehicle is omnibus for and by all firstly to widen the way for input of more ideas and good practices of non Western origin and secondly to include non state actors as legitimate stakeholders in global governance Some trends already signal an opening towards omnilateralism enhancing global governance in the COP by adding Eastern understanding of cycles in nature to protect the environment e g in circular economies and a wider appreciation of holism beyond the rather linear individualistic thinking of Western societies also accountable groups of civil society more trusted than officials driven

by narrow national interest increasingly enrich deliberations about climate change and other global problems that need global solutions These require East West and North South cooperation as currently obvious in the urgent cross border exchanges among experts to combat the pandemic and save lives and livelihood worldwide Globalisation has elevated millions out of poverty However narrow minded politicians still claim national sovereignty and parochial interests against global solutions for the common good while the Westphalian nation is becoming a historic aberration Almost all governments nowadays claim democracy but respect for its principles is falling Democracy must adapt to each level of governance from local national regional to global More direct democracy may suit the directly informed local stage The higher the stage and the wider the impact the more expertise and responsibility with all stakeholders is needed to reach the common global good i e omnilaterally
