Storytelling Across Worlds Tom Dowd, 2015-01-30 Don't restrict your creative property to one media channel. Make the essential leap to transmedia. From film to television to games and beyond, *Storytelling Across Worlds* gives you the tools to weave a narrative universe across multiple platforms and meet the insatiable demand of today's audience for its favorite creative property. This is the first primer in the field for both producers and writers; it teaches you how to employ film, television, games, novels, comics, and the web to build rich and immersive transmedia narratives. Create writing and production bibles for transmedia property. Monetize your stories across separate media channels. Manage transmedia brands, marketing, and rights. Work effectively with writers and producers in different areas of production. Engage audiences with transmedia storytelling. Up-to-date examples of current transmedia and cross-media properties accompany each chapter and highlight this hot but sure to be enduring topic in modern media.

Out of This World Library Programs Joel A. Nichols, 2017-02-06 Focusing on the most compelling titles across the vast area of imaginative fantasy and science fiction literature and media, this book showcases creative ways to build on existing interest in these genres and promote reading literacy and critical thinking. Science fiction and fantasy stories captivate the imaginations of youth and adults even today when real-life technological developments often border on the unbelievable. We see evidence of the universal appeal of sci-fi and fantasy-themed tales in popular books, movies, and television series from *The Hunger Games*, *The Martian*, and *Star Wars* to *Jessica Jones* and *The Man in the High Castle*. This guide provides avenues for making use of what naturally interests young audiences: pre-teen through emerging or new adult, with some 50 programs based on speculative fiction. For each of the literature-based programs, the book provides a description of the project that identifies the appropriate age level and its goals and learning objectives, as well as the duration of time and materials needed. While the selection of titles is diverse, special emphasis is given to media and books created by women and people of color. The step-by-step directions, annotation of the book on which the project is based, list of related titles, and special tips ensure that you'll be able to easily implement the program in your classroom or library. Most of the programs have a technology-related component but can be adapted to be done as traditional crafts. All of the programs are appropriate for students in English and creative writing classes, as well as for youth or young adults in a public library setting.

Otherworldly Politics Stephen Benedict Dyson, 2015-06-30 To the extent that politics involves decision-making amidst an array of competing values, most of human interaction may be understood as political. For students of international relations and political science, it can be a daunting task to evaluate value propositions in debate and discussion of issues with equally compelling opposing sides. Fictions found in storybooks, on the stage, and on the silver screen, however, offer scenarios in which value propositions may be sorted out as low-stakes case studies. To help his students think critically about international relations and politics, Stephen Benedict Dyson has found that using the fictional realities of three different television and cable programs—*Star Trek: Battlestar Galactica* and *Game of Thrones*—so thoroughly engages his

students in the classrooms that conversations frequently spill out into the hallways after class and onto Blackboard discussion groups Students strong grasp of these shows events themes characters and plot lines allow them to more easily understand the theory of international relations and politics and then translate that theory into contemporary political scenarios
