## **Essentials Of Sociology 10th Edition:**

**Essentials of Sociology** James M. Henslin, 2010 *Essentials of Sociology A Down to Earth Approach* is heralded by students and instructors alike as the most friendly and inviting introduction to sociology available. James Henslin guides students on an intellectual voyage through the sociological imagination, helping them better understand both themselves and their world. With humor, personal reflection, and illuminating examples, he shares with readers his passion for sociology. Six central themes run throughout the text: down to earth sociology, globalization, cultural diversity, critical thinking, the new technology, and the influence of mass media on everyday life. Each of these themes is reflected in the central narrative, in boxed features throughout the text, and in MySocLab. *Essentials of Sociology A Down to Earth Approach* 9th edition is the first edition of Henslin's to feature integration with MySocLab. MySocLab now features diagnostic quizzing, Social Explorer activities, The Way We Live video activities, links to The Social Lens blog, and over 100 primary source readings. [Essentials of Sociology Revel Access Card](#) James M. ## **Sociological Theories of Health and Illness** William C

Cockerham, 2020-07-09 *Sociological Theories of Health and Illness* reviews the evolution of theory in medical sociology, beginning with the field's origins in medicine and extending to its present-day standing as a major sociological subdiscipline. Sociological theory has an especially important role in the practice of medical sociology because its theories distinguish the subdiscipline from virtually all other scientific fields engaged in the study of health and illness. The focus is on contemporary theory because it applies to contemporary conditions; however, since theory in sociology is often grounded in historical precedents and classical foundations, this material is likewise included as it relates to medical sociology today. This book focuses on the most commonly used sociological theories in the study of health and illness, illustrating their utility in current examples of empirical research on a wide range of topics. The qualitative or quantitative research methods applicable to specific theories are also covered. Distinctions between macro and micro level levels of analysis and the relevance of the

agency structure dichotomy inherent in all theories in sociology are discussed Beginning with classical theory Durkheim Weber and Marx and the neglected founders Gilman Martineau and DuBois along with symbolic interaction Mead Strauss and labeling theory Becker and poststructuralism and postmodernism Foucault coverage is extended to contemporary medical sociology Discussion of the stress process model Pearlin is followed by the social construction of gender and race and intersectionality theory Collins health lifestyle theory Cockerham life course theory Elder fundamental cause theory Link and Phelan and theories of the medical profession Freidson medicalization and biomedicalization Conrad Clarke and social capital Bourdieu Putnam and Lin
