Lecture 1

Chapter 2 Budget

2.1 Budget Constraint

Budget Constraint: represents all the combinations of goods and services that a consumer may purchase given current prices within his or her given income.

Consumption Bundle: $\{x_1, x_2\}$, is the collection of all the goods and services consumed by that individual.

- x is simply an abbreviation for the list of two numbers: $\{x_1, x_2\}$

$$p_1 x_1 + p_2 x_2 \leq m$$

Where:

- $p_1 x_1$: money consumers spend on good 1
- $p_2 x_2$: money consumers spend on good 2
- m : income

Affordable consumption bundles: those that don't cost any more than m .

2.2 Two goods are often enough

Budget Constraint: where the money spends on good 1 and good 2 cannot exceed the total amount of money the consumer has to spend, m .

- Composite good (good 2): stands for everything else the consumer might want to consume other than good 1.
- With $p_2 = 1$, so everything that we say about the budget constraint in general will hold under the composite good interpretation.

$$p_1 x_1 + p_2 x_2 \leq m$$

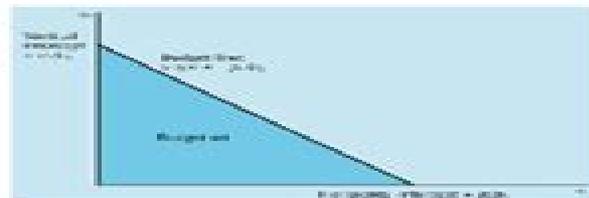

Note: the expenditure of products 1 and 2 can exceed the consumer income.

2.3 Properties of the budget set

Budget line: is the set of bundles that cost exactly m .

$$p_1 x_1 + p_2 x_2 = m$$

Budget set: consist of all bundles that are affordable at given prices and income.

Budget line formula shows how many units of good 2 the consumer needs to consume in order to just satisfy the budget constraint, if she is consuming x_1 units of good 1.

- Economic interpretation: market is willing to "substitute good 1 for good 2."

$$x_2 = \frac{m}{p_2} - \frac{p_1}{p_2} x_1$$

Economics for Policy Makers Gustavo Rinaldi, 2019-04-16 Certain key economic decisions taken by organizations and indeed countries are often not made by economists but by businessmen trade unionists politicians and policy makers Those who employ people those who represent workers those who make laws and those who elect them need economics but may have little time or desire to study it This book makes economics easily available to everyone The author's use of simple language and avoidance of technical jargon provides non economists with a better understanding of economic reasoning and the tools to know and to decide The author achieves this through introducing key concepts in short presentations and arming the reader with selected press articles and recent research using these concepts An analysis of these demonstrates how a general concept can be derived from a specific context and highlighted questions provide the basis for further debate The reader can then focus on the parts most relevant to their own needs This book will have great appeal to employers trade unionists and public officials attending courses organized by international institutions professional training providers as well as graduate students of courses where economics is an important element especially in relation to its policy implications Finally it is invaluable for anybody who has wanted to learn the basics of practical economics but has been deterred by its technicalities
