Leveraging Transdisciplinary Engineering in a Changing and Connected World Adam Cooper, 2023-11-15 Simple problems have become rare in today's technologically advanced world. Problems are typically much more complex and solving them requires integrative knowledge from several disciplines. Technology alone cannot be the answer. Collaborative teams equipped with knowledge and skills in various disciplines are indispensable to exploit technologies effectively and create new conceptual, theoretical, methodological, and translational innovations that integrate and move beyond discipline-specific approaches to address a common problem in the changing and connected world. This book presents the proceedings of TE2023, the 30th International Conference on Transdisciplinary Engineering held in Hua Hin, Cha Am, Thailand, from 11-14 July 2023. The theme of this year's conference was *Leveraging Transdisciplinary Engineering in a Changing and Connected World* and it provided a forum for more than 115 participants from academia and industry to exchange knowledge and ideas connected to this aspect of transdisciplinary engineering. A total of 117 submissions were received for the conference of which 93 were selected for presentation and publication here following a rigorous abstract and full paper review process. They are arranged under 7 categories: product design and development, team working, smart operations for value chain management, transdisciplinary approaches, engineering education, critical issues in transdisciplinary engineering, and theoretical contributions. Providing a comprehensive overview of the latest innovations and ideas in transdisciplinary engineering, the book will be of interest to all those working in the field.

Workshop Proceedings of the 11th International Conference on Intelligent Environments D. Preuveneers, 2015-07-06 With emerging trends such as the Internet of Things, sensors and actuators are now deployed and connected everywhere to gather information and solve problems, and such systems are expected to be trustworthy, dependable, and reliable under all circumstances. But developing intelligent environments which have a degree of common sense is proving to be exceedingly complicated, and we are probably still more than a decade away from sophisticated networked systems which exhibit human-like thought and intelligent behavior. This book presents the proceedings of four workshops and symposia: the 4th International Workshop on Smart Offices and Other Workplaces (SOOW'15), the 4th International Workshop on the Reliability of Intelligent Environments (WoRIE'15), the Symposium on Future Intelligent Educational Environments and Learning (SOFIEE'15), and the 1st Immersive Learning Research Network Conference (iLRN'15). These formed part of the 11th International Conference on Intelligent Environments held in Prague, Czech Republic, in July 2015, which focused on the development of advanced, reliable intelligent environments, as well as newly emerging and rapidly evolving topics. This overview of and insight into the latest developments of active researchers in the field will be of interest to all those who follow developments in the world of intelligent environments.
