

Note: this key outlines (but does not provide full details) of solutions. It provides what needs to be discussed for a full answer.

1. Fundamentals (5 pts)

Define digital forensics.

Preservation, identification, extraction, documentation, and interpretation of computer media for evidentiary and/or root cause analysis.

2. Roles (30 pts)

How does an investigator's role impact a forensic investigation? Be sure to include a discussion of what forms the basis and what is the primary source of guidance that establishes acceptable actions for each role: individuals, corporate investigators, and criminal investigators.

According to title 18, the individual owner can collect and analyze everything on their machine - analysis must not violate other laws, e.g., reverse engineering licensed software. Their analysis will focus on ensuring the security of their private system.

Corporate investigators are limited by corporate policy in addition to laws. Their analysis focuses on protecting the assets of the corporation. This will include: Maintain system security, ensure operational continuity, investigate system misuse, and identify and manage compromise.

Criminal forensic investigators are guided by the law to protect the public welfare. Behavior during investigation is limited by laws that protect the rights of citizens. Some laws have extended what can be done, e.g., the Patriot Act. Federal, state, and local laws have impact on different classes of investigators. Investigations focus on:

- Investigate computer-related criminal activity
 - Fraud, theft, damage, use of IT in other crimes, etc.
- Investigate other criminal activity
 - Murder, kidnap, fraud, etc.
- Counter-terrorism

3. Hard Drive Volumes (30 pts)

Using the linear HDD model below, draw and label each of the following constructs: Two partitions of approximately equal size (include MBR and disk parameter blocks), draw and label an NTFS file system on one partition, draw and label a 200 Byte file, draw and label a 5 KB file, draw and label unallocated space, draw and label a particular slack space. Describe each term and its digital forensics relevance.

- The Master Boot Record is created and includes the Master Boot Code (MBC) and the Master Partition Table (MPT) – always at sector 1 on any bootable media
 - The MBC is executed at boot if the HDD is designated as the boot device
 - The MPT contains information about logical volumes (partitions), including the active partition, the partition whose Volume Boot Code (VBC) will be executed
 - Each partition has a Disk Parameter Block that stores information about extended partitions, file system type, date and time last mounted, etc.
- Inter-partition gaps are a collection of unused sectors
