Introduction

The Micro Engineering Ladder Track System (LTS) is a series of five different 800 #5 turnouts (list-attached) that, when used in various combinations, allow up to a 30% increase in usable yard area for a given layout space. The various turnouts achieve more compact yards through the use of curved diverging tracks, increased ladder track angle, overlapping turnouts, shorter turnouts and the use of the minimum track spacing of 2-1/2" (26 #5MM standard) between body tracks. The amount of increased yard area is dependent on the type of yard modelled (yard configuration) and the size of the yard. Generally the larger the yard, the more space gained.
