

DANGER

RED | OSHA recommends danger signs or tags be red or predominantly red, with lettering or symbols in a contrasting color (usually white against the red background). Red warns employees of a hazard that could cause serious injury or death.

CAUTION

YELLOW | These signs and tags are all yellow, or predominantly yellow, with lettering or symbols in a contrasting color (usually black). Yellow is often used for signs that indicate physical dangers that could cause serious injuries such as slipping, tripping, falling, striking against and pinch hazards.

WARNING

ORANGE | Orange, or predominantly orange, signs and tags generally have black lettering or symbols. Orange is often used for potentially dangerous parts of machinery or equipment that may cut, crush, shock, or otherwise injure a person.

BIOLOGICAL HAZARD

FLUORESCENT ORANGE/ORANGE-RED | These signs and tags have lettering or symbols in a contrasting color (usually black). This color designates infectious agents and wastes that pose a risk of death, injury or illness.

SAFETY INSTRUCTIONS

GREEN | These signs usually have white lettering against the green background. Some part of the sign may also contain black lettering against a white background. Green is used to designate first-aid equipment, emergency eyewash stations, and so forth.

SLOW MOVING VEHICLES

FLUORESCENT YELLOW-ORANGE | This color is used, with a dark red reflective border, on slow-moving vehicle triangles.

Standard Colour Coding Signs Demarcation:

Risk-based, Management-led, Audit-driven, Safety Management Systems Ron C. McKinnon, 2016-11-25 Risk based Management led Audit driven Safety Management Systems explains what a safety management system SMS is and how it reduces risk in order to prevent accidental losses in an organization It advocates the integration of safety and health into the day to day management of the enterprise as a value rather than an add on and emphasizes that the safety movement must be initiated led and maintained by management at all levels The concepts of safety authority responsibility and accountability are described as the key ingredients to safety system success Safety system audits are expounded in simple terms and leading safety performance indicators are suggested as the most important measurements in preference to lagging indicators McKinnon highlights the importance of the identification and control of risk as a key basis for a SMS with examples of a simple risk matrix and daily task risk assessment as well as a simplified method of assessing analyzing and controlling risks The book refers to international Guidelines on SMS as well as the proposed International Organization for Standardization ISO 45001 which could soon become the international safety benchmark for organizations worldwide Using clear approachable examples the chapters give a complete overview of an SMS and its components Confirming to most of the safety management system Guidelines published by leading world authorities this volume will allow organizations to structure their own world class SMS

AAMI Standards and Recommended Practices, 1994 *The Design, Implementation, and Audit of Occupational Health and Safety Management Systems* Ron C. McKinnon, 2019-11-20 This book covers the design implementation and auditing of structured occupational health and safety management systems SMS sometimes referred to as safety programs Every workplace has a form of SMS in place as required by safety regulations and laws The Design Implementation and Audit of Occupational Health and Safety Management Systems describes some of the elements that constitute an SMS the implementation process and the auditing of the conformance to standards It covers more than 60 processes programs or standards of a system and gives important background information on each element Guidelines and examples show how to design and implement the risk based processes programs and standards and how to audit them against standards The text is based on actual SMS implementation experiences across a wide range of industries It offers a roadmap to any organization which has no structured SMS It will guide them through the process of upgrading their health and safety processes to conform to local and international standards It will lead them away from relying on reactive safety measures such as injury rates to proactive actions which are measured by the audit of the system Features Covers more than 60 elements of a safety management system SMS Provides practical examples of how to design implement and audit a structured SMS Based on actual SMS implementation experience across a wide range of industries Presents the integration of an SMS into the day to day functions of the organization
