A Crack in Everything Marcus Chown, 2024-06-06 What is space What is time Where did the universe come from The answers to mankind's most enduring questions may lie in science's greatest enigma black holes A black hole is a region of space where gravity is so strong that nothing not even light can escape This can occur when a star approaches the end of its life Unable to generate enough heat to maintain its outer layers it shrinks catastrophically down to an infinitely dense point When this phenomenon was first proposed in 1916 it defied scientific understanding so much that Albert Einstein dismissed it as too ridiculous to be true But scientists have since proven otherwise In 1971 Paul Murdin and Louise Webster discovered the first black hole Cygnus X 1 Later in the 1990s astronomers using NASA's Hubble Space Telescope found that not only do black holes exist supermassive black holes lie at the heart of almost every galaxy including our own It would take another three decades to confirm this phenomenon On 10 April 2019 a team of astronomers made history by producing the first image of a black hole A Crack in Everything is the story of how black holes came in from the cold and took cosmic centre stage As a journalist Marcus Chown interviews many of the scientists who made the key discoveries and as a former physicist he translates the most esoteric of science into everyday language The result is a uniquely engaging page turner that tells one of the great untold stories in modern science

The Subjugation of Canadian Wildlife Max Foran, 2018-04-10 Hardly a day goes by without news of the extinction or endangerment of yet another animal species followed by urgent but largely unheeded calls for action An eloquent denunciation of the failures of Canada's government and society to protect wildlife from human exploitation Max Foran's *The Subjugation of Canadian Wildlife* argues that a root cause of wildlife depletions and habitat loss is the culturally ingrained beliefs that underpin management practices and policies Tracing the evolution of the highly contestable assumptions that define the human wildlife relationship Foran stresses the price wild animals pay for human self interest Using several examples of government oversight at the federal provincial and territorial levels from the Species at Risk Act to the Biodiversity Strategy Protected Areas Network and provincial management plans this volume shows that wildlife policies are as much or more about human needs priorities and profit as they are about preservation Challenging established concepts including ecological integrity adaptive management sport hunting as conservation and the flawed belief that wildlife is a renewable resource the author compels us to recognize animals as sentient individuals and as integral components of complex ecological systems A passionate critique of contemporary wildlife policy *The Subjugation of Canadian Wildlife* calls for belief change as the best hope for an ecologically healthy wildlife rich Canada

The Central Asian Economies in the Twenty-First Century Richard Pomfret, 2019-01-15 This book analyzes the Central Asian economies of Kazakhstan the Kyrgyz Republic Tajikistan Turkmenistan and Uzbekistan from

their buffeting by the commodity boom of the early 2000s to its collapse in 2014 Richard Pomfret examines the countries relations with external powers and the possibilities for development offered by infrastructure projects as well as rail links between China and Europe The transition of these nations from centrally planned to market based economic systems was essentially complete by the early 2000s when the region experienced a massive increase in world prices for energy and mineral exports This raised incomes in the main oil and gas exporters Kazakhstan and Turkmenistan brought more benefits to the most populous country Uzbekistan and left the poorest countries the Kyrgyz Republic and Tajikistan dependent on remittances from migrant workers in oil rich Russia and Kazakhstan Pomfret considers the enhanced role of the Central Asian nations in the global economy and their varied ties to China the European Union Russia and the United States With improved infrastructure and connectivity between China and Europe reflected in regular rail freight services since 2011 and China s announcement of its Belt and Road Initiative in 2013 relaxation of United Nations sanctions against Iran in 2016 and the change in Uzbekistan s presidency in late 2016 a window of opportunity appears to have opened for Central Asian countries to achieve more sustainable economic futures

Defensible Faith Robert Ryan,2023-07-19 A persistent dumbing down of religious faith and the perception that science is the only path to truth are key reasons the Nones those with no religious affiliation represent nearly fifty percent of all young adults in America today God and science are falsely portrayed as conflicted and innately incompatible Afraid to offend this new status quo and unable to defend religious beliefs against increasingly aggressive intellectual bullying the young have flocked to the safety of no belief In *Defensible Faith* author Robert Ryan demonstrates that God and science are both true and are both necessary in understanding ourselves and the world around us He looks at how science provides many compelling arguments for belief in God as well as the more philosophical justifications for faith and the evidential basis supporting Christianity If you have ever struggled to defend your faith in an intellectually well reasoned manner then let this book be your guide

Margalla Papers ,2008 [Mary, the Mother of Jesus](#) Stephen Bohr,2010 This sobering Biblical look at Mary the mother of Jesus dispels many of the false traditions circulating about this remarkable woman This series is very important for every Christian to watch and be aware of the history surrounding this subject as it may give us clues to what may soon be coming upon the face of the earth Satan is out to deceive the very elect and anyone who is ill prepared could fall for deception Pastor Bohr also examines where the idea originated of Peter being the head of the Church as the first of a subsequent apostolic succession of bishops and why the Roman Catholic Church uses this belief as its authority to openly promote dogmas and traditions not found in Scripture Was Peter really the Rock on which the church is built Is tradition derived from sources outside of Scripture trustworthy Did a similar reliance on a collection of oral traditions happen once before in ancient history leading to a misunderstanding of prophecy and the consequent misidentification and rejection of Christ at His first coming Could the same thing happen again in the last days just before His second appearing
