consumption patterns with respect to channels places and spaces of clothing purchases and re use The main premise of the book is that although it is still a relatively small part of the fashion market in Poland sustainable fashion design production and consumption is an increasingly important phenomenon with significant social economic and spatial implications The book therefore argues that sustainable design and production constitute a promising opportunity for adaptation restructuring and upgrading of the textile and clothing sector in the European semi periphery Using the metaphor of the fashion ecosystem it also illustrates how sustainable fashion practices contribute to the creation of new links and networks within the fashion industry alongside a more fragmented domestic production structure Chapter 1 and 9 are licensed under the terms of the Creative Commons Attribution 4 0 International License a href <http://creativecommons.org/licenses/by/4.0/> For further details see license information in the chapters
