case studies from each of these domains you'll see examples that demonstrate how to use machine learning as a tool for business enhancement. As a domain expert, you will not only discover how machine learning is used in finance, healthcare, and retail, but also work through practical case studies where machine learning has been implemented.

Machine Learning Applications Using Python is divided into three sections, one for each of the domains: healthcare, finance, and retail. Each section starts with an overview of machine learning and key technological advancements in that domain. You'll then learn more by using case studies on how organizations are changing the game in their chosen markets. This book has practical case studies with Python code and domain-specific innovative ideas for monetizing machine learning.

What You Will Learn
 Discover applied machine learning processes and principles
 Implement machine learning in areas of healthcare, finance, and retail
 Avoid the pitfalls of implementing applied machine learning
 Build Python machine learning examples in the three subject areas

Brandt, Thomas Martin, 1996-12-16. These proceedings contain the papers presented at the 5th IFAC Symposium on Automated Systems Based on Human Skill held in Berlin, Germany, 26-28 September 1995. The symposium, like previous ones in the series, brought together researchers, developers, and users of complex human-machine systems. Discussions covered manufacturing, process control, aircraft, and air traffic control, and administrative processes, with an emphasis on how to design such systems and integrate both developers and users into the design process. The main issues addressed therefore were the joint engineering of production processes, information technology, and work organization, and the possibility that this may lead to the redefinition of human operators in process automation.
