Management and Visualisation Gordon Fletcher,2022-12-27 As organisations of all sizes become increasingly digitalised a core management challenge remains unresolved The ability to successfully and sustainably connect the stated vision of an organisation with its strategic plans and in turn with the reported reality of day to day operations is largely an elusive ambition despite the many stated advantages provided by contemporary technologies In this book the case is made for visual management as a method of communications planning learning and reporting that connects the organisation in a single meaningful and seamless way Throughout this book visual management is theorised around the position that all forms of management documentation are an artefact of human construction and of the organisation itself that reflect learned patterns of activity The book places visual management as a more intuitive and seamless method of coordinating learning and communicating across an organisation than more traditional formats of presenting management documents Consciously assembling the artefacts of an organisation in order to manage it introduces a layer of criticality that encourages reflection and consistency that is often absent from current management practice The benefits that a visual approach brings to organisational management are an increasing necessity as machine learning robotics and process automation remove traditional roles from organisations and necessitate new views on how individuals now fit into a data informed business The

book contributes to the academic debate regarding resource based and knowledge based views of the organisation by advocating a different more holistic viewpoint and will thus appeal to academics and researchers in this area It would also benefit students across business disciplines whilst the practical models and tools offered will benefit directors and managers looking to implement their own visual organisational language **The Self-Motivated Kid** Shimi Kang,2015-08-18 Winner of the 2015 USA Book News International Book Award for Parenting and Family In this inspiring book Dr Shimi Kang a Harvard trained child and adult psychiatrist and an expert in human motivation provides a guide to the art and science of encouraging children to develop their own internal drive and a lifelong love of learning Drawing on the latest neuroscience and behavioral research Dr Kang shows why pushy hovering tiger parents and permissive jellyfish parents actually hinder self motivation She proposes a powerful new parenting model the intelligent joyful highly social dolphin Dolphin parents focus on maintaining balance in their children s lives to compassionately yet authoritatively guide them toward lasting health happiness and success The mother of three children and the daughter of immigrant parents who struggled to give their children the best in life Dr Kang s mother could not read her father taught her math while they drove around in his taxicab and she was never enrolled in a single extracurricular activity Dr Kang argues that often the simplest benefits parents give their children are the most valuable Combining irrefutable science with unforgettable real life stories The Self Motivated Kid walks readers through Dr Kang s four part method for cultivating self motivation She argues that by trusting our deepest intuition about what is best for our kids we will allow them to develop key traits adaptability community mindedness creativity and critical thinking to empower them to succeed and thrive in our increasingly competitive and complex world
