Crosstalk in Modern On-Chip Interconnects B.K. Kaushik, V. Ramesh Kumar, Amalendu Patnaik, 2016-04-06 The book provides accurate FDTD models for on chip interconnects covering most recent advancements in materials and design Furthermore depending on the geometry and physical configurations different electrical equivalent models for CNT and GNR based interconnects are presented Based on the electrical equivalent models the performance comparison among the Cu

CNT and GNR based interconnects are also discussed in the book The proposed models are validated with the HSPICE simulations The book introduces the current research scenario in the modeling of on chip interconnects It presents the structure properties and characteristics of graphene based on chip interconnects and the FDTD modeling of Cu based on chip interconnects The model considers the non linear effects of CMOS driver as well as the transmission line effects of interconnect line that includes coupling capacitance and mutual inductance effects In a more realistic manner the proposed model includes the effect of width dependent MFP of the MLG NR while taking into account the edge roughness

Software Engineering Perspectives in Intelligent Systems Radek Silhavy, Petr Silhavy, Zdenka Prokopova, 2020-12-15 This book constitutes the refereed proceedings of the 4th Computational Methods in Systems and Software 2020 CoMeSySo 2020 proceedings Software engineering computer science and artificial intelligence are crucial topics for the research within an intelligent systems problem domain The CoMeSySo 2020 conference is breaking the barriers being held online CoMeSySo 2020 intends to provide an international forum for the discussion of the latest high quality research results

Field Programmable Logic and Applications Patrick Lysaght, James Irvine, Reiner Hartenstein, 2004-06-22 This book contains the papers presented at the 9th International Workshop on Field Programmable Logic and Applications FPL 99 hosted by the University of Strathclyde in Glasgow Scotland August 30 September 1 1999 FPL 99 is the ninth in the series of annual FPL workshops The FPL 99 programme committee has been fortunate to have received a large number of high quality papers addressing a wide range of topics From these 33 papers have been selected for presentation at the workshop and a further 32 papers have been accepted for the poster sessions A total of 65 papers from 20 countries are included in this volume FPL is a subject area that attracts researchers from both electronic engineering and computer science Whether we are engaged in research into software or hardware seems to be primarily a question of perspective What is unquestionable is that the interaction of groups of researchers from different backgrounds results in stimulating and productive research As we prepare for the new millennium the premier European forum for researchers in field programmable logic remains the FPL workshop Next year the FPL series of workshops will celebrate its tenth anniversary The contribution of so many overseas researchers has been a particularly attractive feature of these events giving them a truly international perspective while the informal and convivial atmosphere that pervades the workshops have been their hallmark We look forward to preserving these features in the future while continuing to expand the size and quality of the events
