others data analysis team teaching testing experimental observation program creation and design role playing exercise simulations training and participation in experiments The teacher can use these experiential learning activities to supplement regular classroom instruction the activities clarify crystallize and expand the understanding gained from the lectures Of special interest All of the exercises can be conducted during class times or can be used as homework assignments The instructor s manual is organized for easy use with a summary of each case guidelines for administering each case plus supplemental or background information An exercise planning table links each exercise with the chapters found in a number of the most commonly used HRM textbooks Most of the cases are based on actual events drawn from the author s professional or consulting experience or from events first reported in the national media Each case is intended to replicate and carry a high degree of fidelity to real world conditions as fully as possible The experiments in the book are intended to serve as both discovery processes and illustrations of the procedures and rules invoked in developing human resources systems In many of these experiments students draw on their own background and perspectives to test out various points of view The experiments illustrate some of the underlying research that often serves as the basis for HRM policies and procedures
