OPC Unified Architecture Wolfgang Mahnke, Stefan-Helmut Leitner, Matthias Damm, 2009-04-05 Motivation for This Book The OPC Foundation provides specifications for data exchange in industrial automation There is a long history of COM/DCOM based specifications most prominent OPC Data Access DA OPC Alarms and Events A on the lower end a model similar to Classic OPC can be used providing only base information while at the upper end highly sophisticated models can be described providing a large amount of metadata including complex type hierarchies **OPC** Jürgen Lange, Frank Iwanitz, Thomas J. Burke, 2010 OPC stands for Openness Productivity and Collaboration symbolizing the new possibilities opening up in automation technology The main objective of the new OPC generation Unified Architecture is to facilitate global interoperability and to define an information and data exchange mechanism that is service oriented multivendor and cross platform capable from the field device on the shop floor to the ERP system on the factory level This book includes information on the birth objectives and fundamentals of OPC and OPC UA the technical specifications that currently exist and those that are in preparation the procedures for designing and implementing components a transparent presentation of the technology through application possibilities and examples and the outlook for the future of OPC and OPC UA Important perspectives and updates in this new edition include the new era and the exciting application possibilities developing with OPC UA the new OPC UA specifications the development of OPC products for Windows Linux and VxWorks companion standards like FDI EDD FDT ADI or PLCopen IEC 61131-3 new interoperability applications with SAP or Beckhoff Server embedded and migration strategies from Classic OPC to OPC UA Fundamentals implementation and application of Classic OPC and OPC UA are discussed comprehensively in this book CD ROM The included CD ROM contains industrial OPC Server and OPC Client tools for evaluation and also several demonstration programs for development commissioning testing and for the simulation of OPC Clients and Servers The OPC Toolbox is suitable for Windows NT 2000 XP Vista Windows 7 Windows CE Linux and VxWorks Furthermore you will find videos and presentations of OPC UA *OPC Unified Architecture* International Electrotechnical Commission, 2020 This part of IEC 62541 defines the OPC Unified Architecture OPC UA Services The Services defined are the collection of abstract Remote Procedure Calls RPC that are implemented by OPC UA Servers and called by OPC UA Clients All interactions between OPC UA Clients and Servers occur via these Services The defined Services are considered abstract because no particular RPC mechanism for implementation is defined in this document IEC 62541-6 specifies one or more concrete mappings supported for implementation For example one mapping in IEC 62541-6 is to XML Web Services In that case the Services described in this document appear as the Web service methods in the WSDL contract Not all OPC UA Servers will need to implement all of the defined Services IEC 62541-7 defines the Profiles that dictate which Services need to be implemented in order to be compliant with a particular Profile Scope page 15

OPC Unified Architecture , **OPC Unified Architecture** International Electrotechnical Commission, 2020 This part

of IEC 62541 defines the Information Model of the OPC Unified Architecture The Information Model describes standardized Nodes of a Server s AddressSpace These Nodes are standardized types as well as standardized instances used for diagnostics or as entry points to server specific Nodes Thus the Information Model defines the AddressSpace of an empty OPC UA Server However it is not expected that all Servers will provide all of these Nodes Scope page 16 *OPC Unified Architecture. Standardization in Smart Grids Mathias Usler,Michael Specht,Christian Dänekas,Jörn Trefke,Sebastian Rohjans,José M. González,Christine Rosinger,Robert Bleiker,2012-12-14 The first successful finished Smart Grid Prototype Projects deliver new requirements and best practices to meet them These solutions will be the base for the upcoming norms and standards in the near future This domain is not only part of one Standard developing Organization SDO but also of many different organizations like ITU ISO IEC and additionally for the electro mobility part the SAE This results in many standards which are based on different aspects Furthermore the European mirror organizations ETSI CEN CENELEC as well as the German mirror groups of these groups are involved which are delivering further rules and adaption for the local market Because of this diversity of organizations involved it is difficult for the local companies which includes energy utility manufacturer and software producer specialized on integration to identify the relevant trends standardization groups and technologies necessary With the EU Mandate M490 to CEN CNELEC and TESI and the Commission being a driving force e g ftp ftp cencenelec eu CENELEC Smartgrid SmartGridFinalReport pdf and http www cenelec eu aboutcenelec whatwedo technologysectors smartgrids html standardization becomes more and more important but it s complex and not easy to be understood Here at OFFIS we provide training but we are always asked for textbooks on our tranings Based on our modules for the SG tranings we would estimate the following chapters to be relevant to SG stakeholders in standardization roughly 16 20 pages per chapter
