Human Rights Concept And Context:

Human Rights Brian Orend, 2002-05-23 Winner 2002 Choice Outstanding Academic Title Award What are human rights What justifies us in believing we have them What are rights holders and duty bearers Who should bear the costs and responsibilities for making human rights real Why have some criticized the human rights perspective And how can those supportive of human rights best respond These and other conceptual issues are discussed in full in the first part of this book The second part offers a detailed account of how the human rights idea came to be such a powerful force in the contemporary world it traces the evolution of human rights from their origins to their present position in our daily lives in political struggles and in both national and international law *Moral Issues in Military Decision Making* Anthony E. Hartle, 2004 Much has changed in warfare in recent years with America now dominant on the international scene and terrorism the new enemy In light of these changes the need for moral grounding in military actions is a more pressing concern than ever When it was originally published *Moral Issues in Military Decision Making* reflected the concerns posed by nuclear stalemate and the lessons of Vietnam In that highly praised work Anthony Hartle outlined the essential elements of the Professional Military Ethic created for American military forces In this new edition he reexamines the moral foundations for America's military leadership in the post 9 11 era Considering world affairs since the first edition the Gulf War Bosnia Afghanistan Iraq 9 11 and the emergence of the United States as an unrivaled military power Hartle explains how these events have raised ethical issues that differ dramatically from those of the Cold War by the war on terrorism homeland defense asymmetric warfare the proliferation of American military interventions and the UN's role in peacekeeping operations Using meticulously analyzed case studies twice as many as in the first edition he considers such moral dilemmas as torture challenging superior officers use of overwhelming force and responding to fire in the presence of civilian shields In this revision Hartle examines further the status of professional military ethics in light of current affairs changes in the articulation of military values and recent research In a new chapter on human rights he relates moral principles directly to values embedded in the Constitution and argues that overwhelming American military power cannot succeed unless it is accompanied by the moral force of the values it seeks to protect difficulties of applying conventional laws of war and human rights doctrine in military operations Hartle convincingly shows that national security is as much about the preservation of moral principles as it is about the protection of America's citizens and borders His book demonstrates that the American military must continue to observe those principles in order to be effective in its primary mission **Environmental Human Rights in the Anthropocene** Walter F. Baber, James R. May, 2023-03-09 Human rights and environmental protection are closely intertwined and both are critically dependent on supportive legal opportunity structures These legal structures consist of access to the courts legal stock or the set of available standards and precedents on which to base litigation and institutional receptiveness to potential litigation These elements all depend on a variety of social political and economic

variables This book critically analyses the complexities of uniting human rights advocacy and environmental protection Bringing together international experts in the field it documents the current state of our environmental human rights knowledge strategically critical questions that remain unanswered and the initiatives required to develop those answers It is ideal for researchers in environmental governance and law as well as interested practitioners and advanced students working in public policy political science and environmental studies

The Refugee Definition in International Law Hugo Storey,2023-09-21 In international law the refugee definition enshrined in Article 1A 2 of the Refugee Convention and its 1967 Protocol is central Yet seven decades on the meaning of its key terms are widely seen as unclear The Refugee Definition in International Law asks whether we must continue to accept this or whether a systematic legal analysis can shed new light on this important term The volume addresses several framework questions concerning approaches to definition interpretation ordering and the interrelationship between the definition s different elements Each element is then analysed in turn applying Vienna Convention of the Law of Treaties rules in systematic fashion Each chapter evaluates the main disputes that have arisen and seeks to distil basic propositions that are widely agreed as well as certain suggested propositions for resolving ongoing debates In the final chapter the basic propositions are assembled to demonstrate that in fact there is now more clarity about the definition than many think and that considerable progress has been made toward achieving a working definition

A Transformatory Ethic of Inclusion

Jayne Clapton,2009-01-01 Inclusion is a topical notion which underpins contemporary human service practices and policies within Western Judeo Christian societies Inclusion is most often considered within socio historical and socio political contexts whereby technical and legislative responses are sought However this book explores the question How ethically defensible is the notion of inclusion in relation to people with intellectual disability The book contends that inclusion is a multifaceted complex concept in a dualistic and dichotomous relationship with exclusion It is argued that historical and contemporary conceptualisations of exclusion for people with intellectual disability have been constructed from various philosophical and theological matrices imbued with particular values about personhood Furthermore it is proposed that the ethical significance of inclusion and exclusion in the context of intellectual disability is defined and perpetuated by expressions of a particular socio symbolic order underpinned by patriarchy and kyriarchy and subjected to two controlling ethics an Ethic of Normalcy and an Ethic of Anomaly Inclusion and exclusion are conceived as phenomena relating to how membership is defined legitimated or repelled by concealed occluding boundaries acting within a patriarchal socio ethical fabric The book argues that Ethical Inclusion is only possible through the rupture of these boundaries by a conceptual tool A Transformatory Ethic of Inclusion This conceptual instrument of rupture embraces the scholarship of feminist ethics and feminist theology Such a rupture requires examining the ways traditional ethical frameworks themselves have conceptually diminished and devalued the authenticity of people with intellectual disability A concept of integrality becomes imaginable Conceptual analysis is framed using a crafting metaphor of a patchwork quilt which is infused with narrative and by which such an ethical exploration is undertaken and impaired traditional ethical theorising is confronted and transformed

Contextual Intelligence in School Leadership Ramodikoe Nylon Marishane,2020-04-28 In *Contextual Intelligence in School Leadership* the author presents a new leadership construct suitable for the 21st century context of school improvement He presents

school leadership from contextual intelligence perspective as a function of various elements which interact within the leadership they shape and the context in which such leadership is exercised to exert influence on the core areas of practice including student learning teacher development and school community engagement The construct represents a departure from the contemporary leadership theories which place emphasis on separate elements of leadership and inadvertently create a problem of disintegration that does not bode well for sustainable school improvement
