Bali Decoded — The Complete Independent Investment Analysis (2026) Dr. Pooyan Ghamari, 2026-02-26 Bali is often viewed as a destination. Few recognize it as a rapidly evolving economic system. Bali Decoded: The Complete Independent Investment Analysis presents a data-driven examination of one of the world's most unique real estate markets where tourism flows, digital nomad migration, infrastructure expansion, and ownership structures combine to create a new investment model. Written by Swiss economist Dr. Pooyan Ghamari, this independent research study moves beyond promotional narratives to analyze the structural forces shaping Bali's property ecosystem. The book explores the economic impact of international tourism demand, leasehold and foreign ownership frameworks explained clearly, build-to-rent villa economics and development margins, infrastructure expansion and regional growth corridors, risk analysis and legal structure considerations, long-term projections for Bali's evolving investment landscape. Unlike traditional residential markets driven by population growth, Bali represents a lifestyle-driven economy where experience, mobility, and remote work redefine property value creation. Designed for investors, developers, family offices, and global capital allocators, this work provides a strategic framework for understanding opportunity and risk in emerging lifestyle markets. This publication is an independent analytical work and is not sponsored by developers or sales organizations. Author: Dr. Pooyan Ghamari, PhD, Swiss Economist, Cross-Border Real Estate Analyst.

The investment methods of valuation and how to apply them to a wide variety of situations. How specific internal and external factors impact on risk, value, and security of income. A range of valuation methods and how and when to apply them. The use of Excel formulae and how to apply them to the income approach.
