Redecentralisation Ruth Wandhöfer, Hazem Danny Nakib, 2023-04-21 The rise of smartphones social media cryptocurrencies and digital assets has changed our lives profoundly over the last decade In tandem the relationship between governments citizens and businesses has evolved creating new sets of challenges and imbalances but also opportunities This

book focuses on the evolving digitisation of the financial industry and the impact this has on users Particular attention is given to the emergence of new technologies such as blockchain smart contracts and AI The increasingly interconnected data driven digital economy which includes many aspects of an individual s and organisation s life has become a challenge for regulators too Matters are complex but also increasingly centralised with a growing trend of distrust Should we push for more decentralisation To shed light on this question we begin by providing an overview of key concepts and develop a high level qualitative framework and approach to what we call Redecentralisation Delving into those technology areas that form part of the tectonic plate shift of our financial system we explore the pillars of money and payments that are at a turning point with the replacement of key infrastructural components necessary for the future of what we call the Digital Financial Ecosystem Digital identity and data privacy also form part of this broader puzzle We then look to the future to consider some of the latest trends and what if scenarios Where do we see Redecentralisation at play in the Digital Financial Ecosystem What is the role of technology in this e g Web3 the Metaverse and Decentralised Finance Can Redecentralisation support an alignment of values across people governments and businesses What is the role of technology in this And finally do we need a new digital social contract to underpin and protect our digital lives
