

Human Computer Interaction – Tutorial Week 5 on Interface and Interaction Design Guidelines

In this week's tutorial will be focusing on interaction design guidelines for mobile applications both from a commercial and research perspective.

Exercise 1

Read the following article that explains 6 main design guidelines while designing mobile applications:

<https://www.codementor.io/design/tutorial/mobile-app-ui-design-principles> (the section on the 3 technical guidelines may also be relevant). From the 6 basic guidelines, choose 3 that are the most relevant for your chosen project idea and discuss why.

1. **Anticipate and Answer Users' Queries:** the concept idea stores summary of trips. It displays messages like "distance covered, score, points and redeemed points."
2. **In-App Search:** the user can search for the trips done in past one week. The user just need to enter the date they took the trip and all the information about the trip will come up e.g. current location and destination, distance in km, scores and points earned, any distraction and speeding.
3. **Single Trail Learning Experience:** the app is very simple to learn in fact the user can switch between menus just by swiping left. The user can also select theme specific to their choice and the theme automatically changes in day and night. In addition, the app also has user guide in form of vides that better helps users navigate through the app.

Exercise 2

Quickly skim through the article uploaded on vUWS (Mobile App Guidelines), particularly focusing on Table 1 on page 5 of the article. A list of 39 guidelines are presented in this Table.

Exercise 2A)

In extension of Exercise 1), choose 5 guidelines that are the most relevant to your proposed project idea and present initial ideas on how you intend to frame your design accordingly based on the guideline.

Human Computer Interaction Tutorial:

Human Computer Interaction for Software Design Linda Macaulay,1994-12-01 User Experience Methods and Tools in Human-Computer Interaction Constantine Stephanidis,Gavriel Salvendy,2024-08-16 This book covers user experience methods and tools in designing user friendly products and services by encompassing widely utilized successful methods including elicitation analysis and establishment of requirements collaborative idea generation with design teams and intended users prototype testing and evaluation of the user experience through empirical and non empirical means This book Provides methods and tools tailored for each stage of the design process Discusses methods for the active involvement of users in the human centered design process Equips readers with an effective toolset for use throughout the design process ensuring that what is created aligns with user needs and desires Covers a wide array of research and evaluation methods employed in HCI from the initiation of the human centered development cycle to its culmination This book is a fascinating read for individuals interested in Human Computer Interaction research and applications Human-Computer Interaction - INTERACT 2009 Tom Gross,Jan Gulliksen,Paula Kotzé,Lars Oestreicher,Philippe Palanque,Raquel Oliveira Prates,Marco Winckler,2009-08-20 INTERACT 2009 was the 12th of a series of INTERACT international conferences supported by the IFIP Technical Committee 13 on Human Computer Interaction This year INTERACT was held in Uppsala Sweden organized by the Swedish Interdisciplinary Interest Group for Human Computer Interaction STIMDI in cooperation with the Department of Information Technology at Uppsala University Like its predecessors INTERACT 2009 highlighted both to the academic and to the industrial world the importance of the human computer interaction HCI area and its most recent breakthroughs on current applications Both experienced HCI researchers and professionals as well as newcomers to the field interested in designing or evaluating interactive software developing new interaction technologies or investigating overarching theories of HCI found in INTERACT 2009 a great forum for communication with people of similar interests to encourage collaboration and to learn INTERACT 2009 had Research and Practice as its special theme The reason we selected this theme is that the research within the field has drifted away from the practical applicability of its results and that the HCI practice has come to disregard the knowledge and development within the academic community **Human-Computer Interaction** Constantine Stephanidis,Gavriel Salvendy,2024-09-28 The pervasive influence of technology continuously shapes our daily lives From smartphones to smart homes technology is revolutionizing the way we live work and interact with each other Human computer interaction HCI is a multidisciplinary research field focusing on the study of people interacting with information technology and plays a critical role in the development of computing systems that work well for the people using them ensuring the seamless integration of interactive systems into our technologically driven lifestyles The book series contains six volumes providing extensive coverage of the field wherein each one addresses different theoretical and practical aspects of the HCI discipline Readers will discover a wealth of information encompassing the foundational elements state of the art

review in established and emerging domains analysis of contemporary advancements brought about by the evolution of interactive technologies and artificial intelligence as well as the emergence of diverse societal needs and application domains These books Showcase the pivotal role of HCI in designing interactive applications across a diverse array of domains Explore the dynamic relationship between humans and intelligent environments with a specific emphasis on the role of Artificial Intelligence AI and the Internet of Things IoT Provide an extensive exploration of interaction design by examining a wide range of technologies interaction techniques styles and devices Discuss user experience methods and tools for the design of user friendly products and services Bridge the gap between software engineering and human computer interaction practices for usability inclusion and sustainability These volumes are an essential read for individuals interested in human computer interaction research and applications

Human-computer Interaction, INTERACT '03 Matthias Rauterberg,Marino Menozzi,Janet Wesson,2003 This work brings together papers written by researchers and practitioners actively working in the field of human computer interaction It should be of use to students who study information technology and computer sciences and to professional designers who are interested in User Interface design

Human-Computer Interaction Steve Howard,Judy Hammond,Gitte Lindgaard,2013-06-05 The theme of the 1997 INTERACT conference Discovering New Worlds ofHCI signals major changes that are taking place with the expansion of new technologies into fresh areas of work and leisure throughout the world and new pervasive powerful systems based on multimedia and the internet HCI has a vital role to play in these new worlds to ensure that people using the new technologies are empowered rather than subjugated to the technology that they increasingly have to use In addition outcomes from HCI research studies over the past 20 years are now finding their way into many organisations and helping to improve and enhance work practices These factors have strongly influenced the INTERACT 97 Committee when creating the conference programme with the result that besides the more traditional HCI research and education focus found in previous INTERACT conferences one strand of the 1997 conference has been devoted to industry and another to multimedia The growth in the IFIP TC13 committee itself reflects the expansion ofHCI into new worlds Membership ofIFIP TC13 has risen to now include representatives of 24 IFIP member country societies from many parts of the world In 1997 IFIP TC13 breaks new ground by holding its sixth INTERACT conference in the Asia Pacific region This is a significant departure from previous INTERACT conferences that were all held in Europe and is especially important for the Asia Pacific region as HCI expands beyond its traditional base

Human-Computer Interaction. Interaction Platforms and Techniques Masaaki Kurosu,2016-07-04 The 3 volume set LNCS 9731 9732 and 9733 constitutes the refereed proceedings of the 18th International Conference on Human Computer Interaction HCII 2016 held in Toronto ON Canada in July 2016 The total of 1287 papers and 186 posters presented at the HCII 2016 conferences and were carefully reviewed and selected from 4354 submissions The papers thoroughly cover the entire field of Human Computer Interaction addressing major advances in knowledge and effective use of computers in a variety of application

areas The volumes constituting the full 27 volume set of the conference proceedings

Human-computer Interaction Alan Dix,1998 Extensively revised and rewritten in light of recent advances this best selling text is a comprehensive examination of human computer interaction The central focus of this exciting revision is the design of computer technology and how computer technology can be made more usable by people It provides a multi disciplinary approach to the subject through a synthesis of computer science cognitive science psychology and sociology and stresses a principled approach to interactive systems design that fits a software engineering environment

The Universal Access Handbook Constantine Stephanidis,2009-06-11 In recent years the field of Universal Access has made significant progress in consolidating theoretical approaches scientific methods and technologies as well as in exploring new application domains Increasingly professionals in this rapidly maturing area require a comprehensive and multidisciplinary resource that addresses current principles
