

# 10 REASONS TO QUIT SUGAR

10 WAYS IN WHICH EATING TOO MUCH SUGAR CAN AFFECT YOUR HEALTH

## #1 DIABETES

Until recently, researchers believed that obesity was the major cause of diabetes, not sugar. However, new research has shown that sugar has a contributory effect to diabetes, beyond simply the calories that it contains. An increase of roughly one can of soda per day was associated with a 1.1% increase in diabetes prevalence. [1]

## #4 ASTHMA

In a 2012 Australian study, children who drank more than half a liter of soft drinks per day were significantly more likely to suffer from asthma or COPD. The greater the consumption of soft drinks, the more likely an individual is to suffer from one of these respiratory conditions. [13]

## #6 IMBALANCED GUT FLORA

Research shows that switching to a high-sugar diet can alter the composition of your gut flora within 24 hours. [8] Imbalances in our gut flora can weaken immunity, impair digestion, increase inflammation, and much more.

## #8 INCREASED RISK OF CANCER

Sugar consumption has been linked to increased risk for ovarian cancer [9], esophageal cancer [10], and endometrial cancer [11], among others. Sugar also leads to obesity, which has been linked to a longer list of cancers.

## #2 IMPAIRED LEARNING & MEMORY

A UCLA study shows that a diet high in fructose can impair the ability to learn and remember. This is particularly concerning given the consumption of high-fructose corn syrup. A diet rich in omega-3 can reduce the damage. [5]

## #3 TOOTH DECAY

The link between sugar and tooth decay is well established. There is also significant evidence that maintaining your intake of excess sugars at below 5% of your diet will help to avoid cavities. [6]

## #5 HEART DISEASE

A 2014 study examined sugar consumption and heart disease. Those individuals who consumed 25% of their calories in the form of sugar were found to have double the risk of heart disease vs those whose intake was 7%. [2]

## #7 OBESITY

Studies in both adults and children have demonstrated a link between sugar sweetened beverages and weight gain. [3] In 2014 the Obesity Center revised its guidance and recommended that children minimize their intake of these drinks. [4]

## #9 HIGHER CHOLESTEROL

Researchers at Emory University found that increased sugar consumption increased several risk factors for heart disease, including the amount of LDL cholesterol and the ratio between LDL ('bad') cholesterol and HDL ('good') cholesterol. [12]

## #10 FASTER AGING

It has long been known that diabetics age faster than other people. Excess blood sugar leads to glycation, when sugar binds with amino acid molecules. The resulting 'advanced glycation end products' prematurely age our skin, and are a factor in many age-related diseases. [7]

Created by Lisa Richards, digestive expert and creator of [TheCandidaDiet.com](http://TheCandidaDiet.com)

Lisa's book, *The Ultimate Candida Diet Program*, contains strategies designed to improve digestion, boost immunity, and improve overall health, through the encouragement of healthy, balanced gut flora.
