learning tools e.g. robotics, serious games, software, intelligent agents across different education levels emerged in recent years. The primary purpose of this book is to respond to the need to conceptualize the emerging term AI literacy and investigate how to teach and learn AI in K-16 education settings. This book examines different aspects of learning artefacts, pedagogies, content, knowledge, and assessment methods of AI literacy education from theoretical discussions to practical recommendations for curriculum and instructional design. An exhaustive summary of current evidence with examples is illustrated in this book as well as cutting edge research that serves as an AI literacy model for different countries contexts.

Part I: Conceptualizing AI literacy provides a detailed discussion on the development of the concepts and frameworks on AI literacy education, discusses the differences and similarities between AI in education (AIED) and AI literacy education, and illustrates the reasons why K-16 students need to learn AI. These concepts are brought together in Part II: K-16 AI literacy education to further summarize the pedagogies, learning content, learning tools, and assessment methods to inform K-16 educators how to design their AI instruction at each education level. After that, Part III: AI literacy for instructional designers explores how instructional designers (i.e. AI developers and teachers) prepare themselves to become ready to design developmentally appropriate tools, platforms, services, and curricula to empower students with AI literacy skills.
