## WORKPLACE

### 1 THE ATRIUM

The atrium provides opportunities for employees to work around the clock, with flexible office spaces. Most working moments in the building are shared, that the terrace in the atrium are the most popular working areas for Dutch employees.

### 2 FLEXIBLE WORKSPACES

Dutch's employees spend significant amounts of time out of the office, in meetings and working in smaller than in previous would need to be. So accommodate this new way of working, The Edge provides flexible workspaces and there are no assigned desks. This, together, has helped for people spontaneously and in-between the amount of space available for broadcast office.

### 3 ACTIVITY BASED WORKING

At The Edge, the percentage of unassigned hot desks for gathering, meeting and break-out spaces is 20%, compared to the average 10% unassigned office workspaces. The Edge is designed to fit an employee's tasks responsibility for increasing what kind of environment they need for each specific task, whether quiet and focused, collaborative and creative, standing sitting, or even eating. These different environments include Activity Based Working.

### 4 CHANGE MANAGEMENT

The building is designed with the future in mind. On a basic, structural level, it could be converted to other uses such as residential or even housing with relative ease. The building was partly commissioned by Ducth's Change Management Commission and with the delivery in 2015, Dutch started to create the organizational plan around the design of the new building, increasing Ducth's strategy with a successful targeted approach on change.

### 5 THE BUBBLE APP

Every employee is connected to the building via access on their smartphones. This app contains strategic functions such as first interface for their smartphone with the building, they can find parking spaces, free desks for position colleagues, report issues to the facilities team, or even manage within the building.

### 6 PERSONALIZED WORKSPACES

Employees can customize their temperature and lighting conditions they choose to work in the building via the mobile app. The app remembers how they use their office, and even tracks their energy use so they're aware of it.

### 7 SMART FACILITIES

The digital infrastructure embedded into The Edge is connected to every building system, lighting, and many other aspects of the building's smart and other systems. This digital infrastructure enables management to automatically generate insights, to lights that need replacing, printers that need paper, and is available of other daily necessities in a large office environment.

### 8 DATA

The vast amount of data generated by the building's digital systems and the mobile app are being used to generate insights for building systems, how they perform to reduce fuel and decrease its own operations, but are understanding an existing environment and is better. Data centers are currently working regarding the future of this data, and the other research and knowledge transfer.

## SUSTAINABILITY

### 1 ORIENTATION

The building's orientation is based on the path of the sun. The green facade on building is maximum daylight while the solar panels on the southern facade shield the workspaces from the sun.

### 2 FACADES

Each facade is uniquely oriented according to its structure and purpose:

- East-facing walls in the south, east and west have vertical openings to provide optimal views and shading, and also generate power for the building.
- Louvers on the south facade are designed according to sun angles and provide additional shading for the office spaces, reducing solar heat gain.
- Solar panels on the south facade provide enough sustainable electricity to power all smart lighting, signage and outdoor areas.
- The facade facades are highly transparent and use their glass to illuminate the building from the outside.
- The atrium facade is highly transparent, allowing natural light over the atrium and giving more light in.

### 3 GREEN LIGHTING

The building integrates an Efficient-recessed LED lighting system, which integrates 20,000 sensors, or connectivity, to monitor air quality, lighting levels, humidity and temperature, allowing the building to automatically adjust lighting use.

### 4 SOLAR PANEL ROOF

Solar panels on the roof of the building generate an energy to power the thermal energy store.

### 5 ENERGY STORE

The atrium acts as a buffer between the workplace and the external environment. It acts as a thermal store and helps the office to keep cool even in summer. The air is then recirculated back out through the top of the atrium where it passes through a heat exchanger to re-use any leftover temperature conditioning.

### 6 RAIN WATER REUSE

Water is collected in the roof and used for flush toilets and to irrigate the green terraces in the atrium and other green areas surrounding the building.

### 7 THERMAL ENERGY STORAGE

The 1,200m<sup>3</sup> storage water system is an efficient alternative energy alternative to an external heat underground.

### 8 HYDROLOGICAL CYCLE

The green spaces that surround the building from the inside, allowing plants and the ecological cycle, allowing plants and insects to thrive in the area safely.
