

Powers of Congress

I. Expressed Powers: Definition & Examples

- A. Definition: Those powers of Congress specifically listed in the Constitution. (a.k.a., Enumerated Powers or Delegated Powers.)
- B. Six examples from Article I, Section 8:
 - 1. Power to tax & borrow – this power is needed to fund government operations.
 - 2. Commerce power – the power to regulate interstate & foreign trade.
 - 3. Currency power – the power to coin money & regulate its value.
 - 4. Power to raise and maintain an army & navy – provides for our standing military forces.
 - 5. Naturalization – the power to determine the process by which immigrants from other countries can become citizens of the United States.
 - 6. Copyrights & Patents – the power to make rules regarding how people can protect their original creative works (copyrights) and their inventions (patents).

II. Implied Powers: Definition & Examples

- A. Definition: The powers of Congress that are not listed in the Constitution, but are implied by those that are. Congress considers implied powers necessary to help carry out expressed powers.
- B. Two examples of implied powers:
 - 1. The Draft – implied by the expressed power to raise an army. The Constitution tells Congress they can raise an army, but it doesn't tell them how to do it. At times in our history, Congress has felt it necessary to draft young men into the service to get the army the country needed. The last time we actually had a draft was in 1973, but young men still have to register for the draft when they turn 18.
 - 2. Minimum Wage – implied by the expressed power to regulate trade. Since Congress can regulate trade, they assume this means they can regulate the businesses of the country that conduct trade. During the hardships suffered by people during the Great Depression, Congress felt it was necessary to dictate to businesses the minimum amount they had to pay their workers. There has been a minimum wage ever since. Currently the federal minimum wage is \$7.25/hour.
