CAPITAL STRUCTURE: BASIC CONCEPTS

Solutions to Questions and Problems

NOTE: All end-of-chapter problems were solved using a spreadsheet. Many problems require multiple steps. Due to space and readability constraints, when these intermediate steps are included in this solutions manual, rounding may appear to have occurred. However, the final answer for each problem is found without rounding during any step in the problem.

1. a. A table outlining the income statement for the three possible states of the economy is shown below. The EPS is the net income divided by the 2,500 shares outstanding. The last row shows the percentage change in EPS the company will experience in a recession or an expansion economy.

	<u>Recession</u>	<u>Normal</u>	<u>Expansion</u>
EBIT	\$5,600	\$14,000	\$18,200
Interest	<u>0</u>	<u>0</u>	<u>0</u>
NI	<u>\$5,600</u>	<u>\$14,000</u>	<u>\$18,200</u>
EPS	\$ 2.24	\$ 5.60	\$ 7.28
%ΔEPS	-60	—	+30

- b. If the company undergoes the proposed recapitalization, it will repurchase:

Share price = Equity / Shares outstanding
 Share price = \$150,000/2,500
 Share price = \$60

Shares repurchased = Debt issued / Share price
 Shares repurchased = \$60,000/\$60
 Shares repurchased = 1,000

The interest payment each year under all three scenarios will be:

Interest payment = \$60,000(.05) = \$3,000

The last row shows the percentage change in EPS the company will experience in a recession or an expansion economy under the proposed recapitalization.

	<u>Recession</u>	<u>Normal</u>	<u>Expansion</u>
EBIT	\$5,600	\$14,000	\$18,200

Chapter 15 Capital Structure Basic Concepts Multiple:

Capital Structure in the Modern World Anton Miglo, 2025-06-13 This book focuses on microeconomic foundations of capital structure theory. It combines theoretical results with a large number of examples, exercises, and applications. The book examines fundamental ideas in capital structure management, some of which are still not very well understood in the business community, such as Modigliani and Miller's irrelevance result, trade-off theory, pecking order theory, asset substitution, credit rationing, and debt overhang. The second edition also covers capital structure issues related to recent developments in financial technology, including crowdfunding and token issues, and discusses significant differences between these innovative ways of firm financing compared to traditional debt and equity. Chapters also discuss the ways in which financial economists were forced to look critically at capital structure after the financial crisis of 2007-2009 and the COVID-19 pandemic, as the problems faced by many companies stemmed from their financing policies. Further, the book analyzes links between capital structure and firm's performance, corporate governance, firm's strategy, and flexibility, and covers such topics as life cycle approach to capital structure management, capital structure of small and start-up companies, corporate financing versus project financing, and examples of optimal capital structure analyses for different companies. This comprehensive guide to capital structure theory will be of interest to all students, academics, and practitioners seeking to understand this fast-developing and critical area.

The ART of Risk Management Christopher L. Culp, 2002-07-11 Learn about today's hottest new risk management tools. One of the hottest areas of finance today, alternative risk transfer (ART) refers to the use of various insurance products to manage market, credit, operational, legal, environmental, and other forms of risk. As the capital and insurance markets continue to converge, the number and complexity of new risk-defraying insurance products available to corporations, brokerages, money managers, and other financial professionals will continue to grow. Expert Christopher L. Culp uses case studies of recent ART transactions used by risk managers to put the field into perspective for financial professionals and to acquaint them with the various types of risk control products now available. In addition, he explores in depth the links between ART, derivatives, and bank-arranged risk financing, and he explains the key differences between classic insurance products and financial guarantees, risk financing, bundled layering, and other ART forms.
