Pages: 573 - 589	Chapter 16 - Waste Generation, Terrestrial Pollution, and Waste Disposal MODULE 51 GUIDE <i>"Only Humans Generate Waste"</i>		Due:
Learning Goals:	<ul style="list-style-type: none"> ● Explain why we generate waste and describe recent waste disposal trends ● Describe the content of the solid waste stream in the United States 		
Key Term AD's (flashcards):			
Waste	Municipal Solid Waste (MSW)	e-waste	
<p>What is municipal solid waste, and why has human society produced increasing amounts of it over time?</p> <p>Municipal solid waste is waste that is collected by municipalities from households, prisons, schools, municipal buildings, hospitals, and other small businesses. There is a relationship between the amount of waste and population, for instance, as the population increases, the amount of municipal waste increases.</p> <p>What does the term "Throwaway Society" mean? Why is relevant to waste generation/management?</p> <p>Throwaway Society refers to how people use items and get rid of them immediately after. This is important to understand because this idea results in more waste generation. This leads to new solutions for waste management in the future.</p> <p>What are the main sources of waste generation in developed countries such as the United States?</p> <p>Currently the main sources of waste generation in the United States is left over food, plastic, and paper.</p> <p>When broken down by composition, what type of product makes up the largest fraction of MSW?</p> <p>Food, yard waste, and paper make up more than half of Municipal Solid Waste by its weight.</p> <p>What types of waste can be composted? What do these products have in common that allows this?</p> <p>Organic material is what makes up most of the things that are composted. Adding onto that, Food scraps as well as yard waste are the most common compostable items.</p> <p>What are the major challenges that E-Waste poses, and how has it been dealt with so far?</p> <p>E waste contains mercury, lead, cadmium, and other toxic metals. These toxic metals can leach into the groundwater around a landfill. To solve these problems, e-waste away from landfills.</p> <p>Why is waste reduction generally considered to be the most important & effective of the "3 R's"?</p>
