in the subject Business economics Business Management Corporate Governance grade NA University of Glasgow Adam Smith Business School language English abstract Within luxury an area that is becoming increasingly important due to the visibility of this industry is Corporate Social Responsibility CSR While consumers are still not actively demanding CSR in luxury products and services and there is evidence that CSR is not a key area of interest for the luxury industry the luxury industry is becoming the target of non governmental organizations NGOs and other stakeholders interested in environmental and ethical practices Thus it is essential that luxury companies explore CSR implementation as neglecting to do so is likely to affect their brands and their brand value Due to the increasing relevance of CSR within luxury this research explores the role of CSR within luxury and how it together with other factors contributes to brand value in luxury An additional consideration is that despite the importance of brand value in luxury the industry does not normally measure manage and leverage brand value As a result it is also necessary to examine how brand value is perceived within luxury To meet these research goals a mixed methods approach was selected More specifically a theoretical framework was built with input from the literature and interviews with key interviewees from the luxury industry Then the theoretical framework was tested quantitatively The quantitative analysis was conducted with a dataset based on consumer panels and additional secondary data including Bloomberg CSRHub Dow Jones Sustainability Index DJSI Interbrand and company reports The results were subject to credibility checks with interviewees from the industry It is noteworthy to highlight that for the statistical analysis one of the largest datasets with US consumer data was used Similarly for the qualitative interviews representatives from some of the largest luxury companies in the world in terms of brand value and luxury stakeholders were recruited

the direct comparison of the participants images of the two cities Hamburg s image was found to be far better Together with the finding that the brand communication for Hamburg was more authentic and addressed its target groups more precisely than the brand communication for Munich the above mentioned findings led to the conclusion that the overall branding strategy for Hamburg is more successful than that for Munich
