**Revolutionary Parks** Emily Wakild, 2025-10-28 Winner of the Alfred B. Thomas Award, Southeastern Council of Latin American Studies. Revolutionary Parks tells the surprising story of how forty national parks were created in Mexico during the latter stages of the first social revolution of the twentieth century. By 1940, Mexico had more national parks than any other country. Together, they protected more than two million acres of land in fourteen states. Even more remarkable, Lázaro Cárdenas, president of Mexico in the 1930s, began to promote concepts akin to sustainable development and ecotourism. Conventional wisdom indicates that tropical and post-colonial countries, especially in the early twentieth century, have seldom had the ability or the ambition to protect nature on a national scale. It is also unusual for any country to make conservation a political priority in the middle of major reforms after a revolution. What emerges in Emily Wakild's deft inquiry is the story of a nature protection program that takes into account the history, society, and culture of the times. Wakild employs case studies of four parks to show how the

revolutionary momentum coalesced to create early environmentalism in Mexico According to Wakild Mexico s national parks were the outgrowth of revolutionary affinities for both rational science and social justice Yet rather than reserves set aside solely for ecology or politics rural people continued to inhabit these landscapes and use them for a range of activities from growing crops to producing charcoal Sympathy for rural people tempered the radicalism of scientific conservationists This fine balance between recognizing the morally valuable if not always economically profitable work of rural people and designing a revolutionary state that respected ecological limits proved to be a radical episode of government foresight

**Death in Glacier National Park** Randi Minetor, 2026-02-17 Adventures in the wilderness can be dramatic and deadly Glacier National Park s death records date back to January 1913 when a man froze to death while snowshoeing between Cut Bank and St Mary All told 260 people have died or are presumed to have died in the park during the first hundred years of its existence One man

fell into a crevasse on East Gunsight Peak while skiing its steep north face and another died while moonlight biking on the Sun Road A man left his wife and five children at the Apgar picnic area and disappeared on Lake McDonald His boat was found halfway up the west shore wedged between rocks with the propeller stuck in gravel Collected here are some the most gripping accounts in park history of these unfortunate events caused by natural forces or human folly **Parks for Life** Jeffrey A.
