Luke,2019-12-13 Multilevel Modeling is a concise practical guide to building models for multilevel and longitudinal data Author Douglas A Luke begins by providing a rationale for multilevel models outlines the basic approach to estimating and evaluating a two level model discusses the major extensions to mixed effects models and provides advice for where to go for instruction in more advanced techniques Rich with examples the Second Edition expands coverage of longitudinal methods diagnostic procedures models of counts Poisson power analysis cross classified models and adds a new section added on presenting modeling results A website for the book includes the data and the statistical code both R and Stata used for all of the presented analyses [Statistics for Linguists](#) David Eddington,2016-01-14 Linguists with no background in statistics will find this book to be an accessible introduction to statistics Concepts are explained in non technical terms and mathematical

formulas are kept to a minimum The book incorporates SPSS which is a statistics package that incorporates a point and click interface rather than complex line commands Step by step instructions are provided for some of the most widely used statistics in linguistics At the same time the concepts behind each procedure are also explained Traditional analyses such as ANOVA and t tests are included in the book but linguistic data is often not amenable to such analyses For this reason non parametric and mixed effects procedures are also introduced
