Canadian Journal of Chemistry ,2003   Journal of the Institution of Electrical Engineers ,1922   *Selecting Models from Data* P. Cheeseman,R.W. Oldford,2012-12-06 This volume is a selection of papers presented at the Fourth International Workshop on Artificial Intelligence and Statistics held in January 1993 These biennial workshops have succeeded in bringing together researchers from Artificial Intelligence and from Statistics to discuss problems of mutual interest The exchange has broadened research in both fields and has strongly encour aged interdisciplinary work The theme ofthe 1993 AI and Statistics workshop was Selecting Models from Data The papers in this volume attest to the diversity of approaches to model selection and to the ubiquity of the problem Both statistics and artificial intelligence have independently developed approaches to model selection and the corresponding algorithms to implement them But as these papers make clear there is a high degree of overlap between the different approaches In particular there is agreement that the fundamental problem is the avoidance of overfitting Le where a model fits the given data very closely but is a poor predictor for new data in other words the model has partly fitted the noise in the original data   **Journal of the Society of Telegraph Engineers and of Electricians** ,1922 Includes the Society s list of officers members and associates   **A Collection of Technical Papers: Structures and materials** ,1987   **Proceedings of the Institution of Electrical Engineers** Institution of Electrical Engineers,1922 Vols for 1970 79 include an annual special issue called IEE reviews   **Tunable Solid State Lasers** P. Hammerling,A.B. Budgor,A. Pinto,2013-04-17 In recent years there has been renewed interest in the scientific and indu strial communities in tunable solid state vibronic lasers Much of this has been spurred by the user desirous of obtaining compact primary laser sources independent of nonlinear optical frequency shifts throughout the visible and near infra red spectral regi ons To further motivate and stimul ate re search and development in this area workshops sponsored by the Laser Divi sion of the US ArmY Night Vision Electro Optics Laboratory NVEOL at Fort Belvoir Virginia were held during 1 3 April 1981 and 16 17 June 1983 at Keystone and NVEOL respectively The consensus of opinion of the partici pants at these workshops was that any successful program leading to the iden tification and development of vibronic tunable laser materials in the visible and IR must include coordinated activity between crystal growers theoreti cal and experimental investigators into the fundamental processes of vibro nic lasing and laser device engineers Continued interaction between govern ment industry and academia was encouraged in order to establish a unified approach to these areas and when necessary redefine and redirect program matic activity The organization of this 1st Annual Conference on Tunable Solid State La sers held at the La Jolla Institute 13 15 June 1984 was based around the latest results in tunable vibronic materials and laser development but structured ina manner consi stent wi th the recommendati ons of the NVEOL workshops   Geothermal Energy Richard Allen Downing,D.
