The SAGE Handbook of Learning and Work Margaret Malloch, Len Cairns, Karen Evans, Bridget N.

O'Connor, 2021-10-13 The first two decades of the 21st century have contributed a growing body of research theorisation and empirical studies on learning and work This Handbook takes the consideration of this topic into a new realm moving beyond the singular linking of identity learning and work to embrace a more holistic appreciation of learners and their life long learning Across 40 chapters learners learning and work are situated within educational organisational social economic and political contexts Taken together these contributions paint a picture of evolving perspectives of how scholars from around the world view developments in both theory and practice and map the shifts in learning and work over the past two decades Part 1 Theoretical perspectives of learning and work Part 2 Intersections of learning and work in organisations and beyond Part 3 Learning throughout working lives and beyond Part 4 Issues and challenges to learning and work Storytelling for Sustainability in Higher Education Petra Molthan-Hill, Heather Luna, Tony Wall, Helen Puntha, Denise Baden, 2020-03-25 To be a storyteller is an incredible position from which to influence hearts and minds and each one of us has the capacity to utilise storytelling for a sustainable future This book offers unique and powerful insights into how stories and storytelling can be utilised within higher education to support sustainability literacy Stories can shape our perspective of the world around us and how we interact with it and this is where storytelling becomes a useful tool for facilitating understanding of sustainability concepts which tend to be complex and multifaceted The craft of storytelling is as old as time and has influenced human experience throughout the ages The conscious use of storytelling in higher education is likewise not new although less prevalent in certain academic disciplines what this book offers is the opportunity to delve into the concept of storytelling as an educational tool regardless of and beyond the boundaries of subject area Written by academics and storytellers the book is based on the authors own experiences of using stories within teaching from a story of the Ecology of Law to the exploration of sustainability in accounting and finance via contemporary cinema Practical advice in each chapter ensures that

ideas may be put into practice with ease In addition to examples from the classroom the book also explores wider uses of storytelling for communication and sense making and ways of assessing student storytelling work It also offers fascinating research insights for example in addressing the question of whether positive utopian stories relating to climate change will have a stronger impact on changing the behaviour of readers than will dystopian stories Everyone working as an educator should find some inspiration here for their own practice on using storytelling and stories to co design positive futures together with our students
