with a positive impact on all aspects of teaching and learning. It is possible to design personalized learning paths for each learner, including those with special needs or who speak different languages, by adjusting the content and pace according to their strengths and weaknesses. AI tools such as virtual assistants and interactive educational applications can give immediate feedback to learners, which is of paramount importance to keep them engaged and encourage continuous learning. Similarly, teachers can view AI-based data analytics and recommendations to improve their teaching methods and adapt their strategies in real time.

Supporting Personalized Learning and Students Skill Development With AI offers an in-depth exploration of how to integrate AI technology into pedagogical practice to revolutionize education by exploring all aspects of AI in education, from intelligent tutoring systems that tailor lessons to the needs of each learner to automating administrative tasks that save teachers time. While addressing the ethical and practical challenges of this transformation, it highlights the urgent need to equip educators with the skills they need to benefit from AI. Covering topics such as autonomous learning, emotion detection, and digital literacy, this book is an excellent resource for teachers, school administrators, educational decision makers, computer developers, professionals, scholars, academicians, researchers, and more.

AI in Social Studies Education Christopher H. Clark, Cathryn van Kessel, 2025. The introduction of widely available generative AI tools has caused a frenzy of both positive and negative reactions. Between utopian visions and apocalyptic predictions of AI's impact on education, there is a need to thoughtfully consider what education in the age of AI can and should look like. This volume focuses on the implications of AI technology for teachers in K-12 and university settings, providing a careful look at its affordances and drawbacks for social studies curriculum and teaching. Scholars specializing in the field of social studies education provide information and practical ideas for teaching with current technology alongside frameworks for thinking about future iterations of AI. This book fills a critical need, especially among educators, to consider the current and potential future impacts of AI while avoiding the traps of alarmism or techno-utopianism. Whether skeptical or enthusiastic about AI, every social studies educator will find something useful to their practice in this book.

Book Features: First-ever compilation of AI considerations and strategies in the context of social studies education. Nontechnical explanations of what AI can do and not do in practical educational contexts to enable educators to approach its use with careful judgment. Advice for educators to help them assess future iterations of AI technology. Critical considerations of AI across multiple contexts, e.g., ethics, equity, multilingual learners, cybersecurity. Work from leaders in technology and social studies education across Canada and the United States. Contributors: Erin C. Adams, Curby Alexander, Elizabeth Barrow, Daphanie Bibbs, Ariel Cornett, Matthew Cress, Kevin Donley, Leslie Smith, Duss Lindsay, Gibson Thomas, C.
