

Intelligent Battery and Power System™

Pre-engineered Power System adds Clean, Safe, and Space-Saving Lithium-Ion Battery Back-up and Portability to your OEM Equipment.

The *Intelligent Battery and Power System* (IBPS) allows designers to add Smart rechargeable Lithium-Ion (Li-Ion) battery power as an OEM component in computers, electronic equipment and electromechanical devices. The IBPS serves as the complete AC/DC power supply. It provides clean regulated DC, sourced from Li-Ion battery packs, wall-outlet AC or external DC sources available on vehicles and ships. System designers can now easily create an isolated or portable battery backed-up device. If the AC wall power or external DC supply is lost or unplugged, the battery instantly switches in without interruption. The equipment is now portable or securely running in battery back-up mode. With external power restored, the attached battery packs recharge. The IBPS utilizes the same safety circuitry and high quality, low-cost battery cells found in laptop computers.

The IBPS microprocessor continuously communicates with the attached Smart Battery packs in the system, managing charging and discharging, and responding to key events. A variety of Battery Management Modules and DC Converters can manage up to 8 packs each, to provide up to 760 Watt-hours of high density Li-Ion battery power to your device. Larger systems can be developed using the CB-04 Communication Module to add enhanced management features. The regulated output is compatible with an ATX power supply for ease of use with off the shelf computer components.
